

**MASCOT® WORKWEAR**

MASCOT® SAFE | High-visibility clothing for all industries

EN

# ***MAXIMUM VISIBILITY*** **FOR ALL INDUSTRIES**

At MASCOT, you will find one of the industry's widest ranges of certified safety clothing. Our hi-vis clothing is designed to give you the best visibility and safety so that you can carry out your work safely. MASCOT® SAFE is divided into different ranges so that you can find the solution that best suits your needs. Choose from a wide range of product types for both men and women – in three fluorescent colours and several contrasting colours.

## **Modern design and innovative materials**

MASCOT® SAFE offers a wide range of products that combine modern, sporty design with functionality. Several products feature segmented reflectors, which give the clothing a smart, visual look. The safety clothing is designed in innovative materials, each with their own unique properties – carefully developed to meet different needs across industries and work tasks. The products are highly durable and designed to provide a maximum level of comfort in daily use. In addition, a large selection is suitable for industrial washing.

## **Ultimate freedom of movement with ULTIMATE STRETCH**

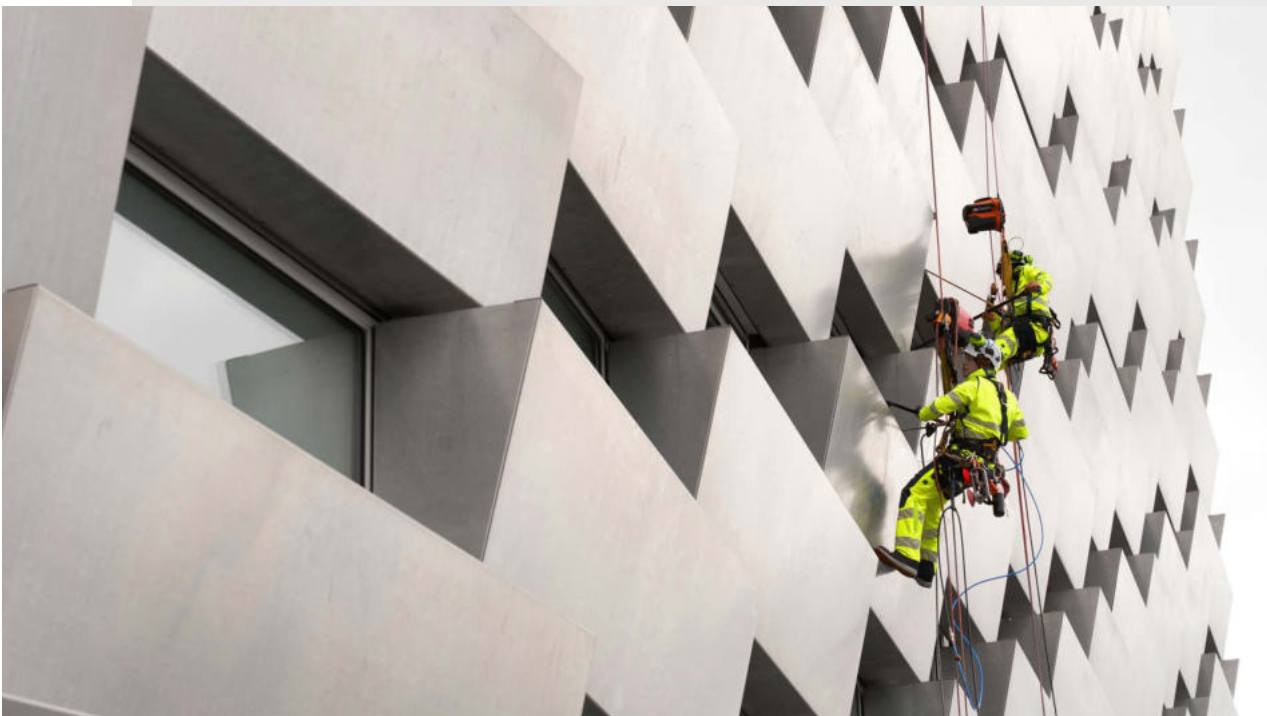

A wide range of products in MASCOT® SAFE feature ULTIMATE STRETCH, which provides the ultimate freedom of movement. The products can also be industrially washed without compromising their high level of durability and comfort. Highly comfortable safety clothing is more likely to be used in the relevant situations, thus protecting you in the best possible way.

## **High visibility and safety with EN ISO 20471**

Most of the products in MASCOT® SAFE are certified according to EN ISO 20471. This means that you get a maximum level of visibility in both daylight and darkness. The clothing is available in three safety classes, and many products can be combined to achieve the highest classification, class 3. This means you can always find a solution that matches your work tasks and safety requirements.

## **More than just a product**

At MASCOT, you get more than just products, you get everything in one solution. International customer service, a user-friendly and time-saving ordering platform (MASCOT® SmartStore), high-quality logo printing and efficient logistics. Your new products are shipped to you from our state-of-the-art, fully automated logistics centre located in central Denmark, where more than 98% of all stock orders – without logos – are shipped within 24 hours.

# *A COMPLETE SOLUTION* FOR THE ENTIRE COMPANY

At MASCOT, you get a complete solution with workwear in the same design for every work situation. It is unique that we can clothe the entire company, regardless of whether the need is for workwear, high-visibility clothing or multi-protective clothing.

The design line across the MASCOT® ACCELERATE, MASCOT® ACCELERATE SAFE and MASCOT® ACCELERATE MULTISAFE ranges is the same, allowing you to create a strong and common identity across job functions within the company.

Mix & Match our products across ranges and colours to achieve a professional look from head to toe.

# INTRODUCTION TO ***PROTECTIVE CLOTHING AND CERTIFICATIONS***

## What is protective clothing?

Protective clothing [PPE - Personal Protective Equipment] is clothing that either replaces or supplements regular workwear to protect against potential hazards in the work environment. It forms an important part of personal protective equipment, which includes both protective clothing, but also equipment for the eyes, head, feet, lungs, etc.

Personal protective equipment is divided into three categories depending on the level of risk:

Category I: Simple protective equipment - low risk

Category II: Personal protective equipment not included in category 1 or 3

Category III: Complex protective equipment that protects against life-threatening situations or irreversible damage to health - high risk.

It is the employer's responsibility to conduct a risk analysis and determine what PPE is needed in the specific work situation. However, we also take our share of responsibility. That's why all our PPE is compliant with the Personal Protective Equipment Regulation - EU 2016/425. You can find the applicable Declaration of Conformity for all MASCOT PPE on our website.

# ***HIGH-VISIBILITY WORKWEAR*** **WITH EN ISO 20471**

When working on construction sites, near traffic or other motorised vehicles – daylight or darkness – visibility is crucial for safety. By dressing your employees in certified high-visibility clothing, work can be carried out safely without the risk of serious accidents.

EN ISO 20471 is an internationally recognised standard that sets requirements for high-visibility workwear for employees in high-risk areas. The standard is divided into three classes according to the risk zone in which you work and how well the product protects the user. Class 3 provides the highest level of protection.

## **Combine products and achieve the highest level of protection**

When you need the highest safety class in EN ISO 20471, there are two options. Either choose a product that is class 3 on its own, or choose two products that together are certified to class 3. At MASCOT, we have a simple letter system that makes it easy to understand the different classes and combine products to create class 3 clothing.

**EN ISO20471**

**EN 17353**

## **EN 17353 – High-visibility workwear for medium-risk situations**

Workwear certified according to EN 17353 is suitable for employees who need to be visible in work situations where it is not required to wear workwear certified according to EN ISO 20471.

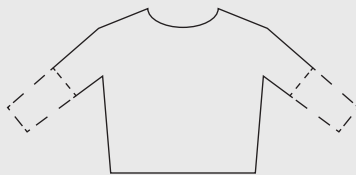

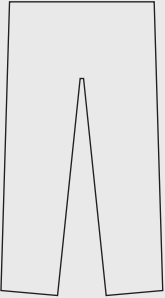

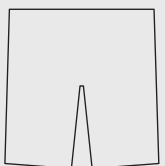

EN 17353 sets requirements for improved visibility in workwear for employees in medium-risk work situations. Workwear is divided into three categories of visibility: Type A, Type B and Type AB.

- Type A provides protection in daylight.
- Type B provides protection in the evening and at night.
- Type AB provides protection in daylight, twilight and at night.

All MASCOT's EN 17353 certified products meet the requirements of EN 17353 Type A.

## Assembly-certification

At MASCOT you can combine two individual products with EN ISO 20471 certification and attain class 3 for the assembled set.

|                                                                                                                      |   | Tops with reflective strips on sleeves                                                              |                                                                                                      | Vests, and tops without reflective strips on sleeves                                                  |  |

\*) Bib & Braces can be combined into a certified class 2 or 3 as long as the upper body garment is worn over the bib. If the T-shirt or top is worn under the bib, then it is the class of the Bib & Brace alone that determines the total class.

# HI-VIS PRODUCTS WITH *EXTRA HIGH SAFETY*

MASCOT's high-visibility workwear is certified according to EN ISO 20471. In addition to meeting the requirements of EN ISO 20471, we also have a selection of products that provide the user with extra visibility, as the products have vertical reflectors along the legs and sleeves.

# *RIS-3279-TOM* - HIGH VISIBILITY WORKWEAR

RIS-3279-TOM is a standard for high visibility workwear that applies specifically to the railway industry in the United Kingdom. The standard ensures that railway workers have the highest visibility and thus safety when working on or near the railway. High visibility is the fundamental principle behind RIS-3279-TOM. The standard is based on the European standard EN ISO 20471 and requires that the clothing meets at least class 2. The clothing must also be hi-vis orange.

# PROTECTION AGAINST *COLD AND PRECIPITATION*

When cold and precipitation are a real challenge, you need to be able to rely on your clothing to provide optimal protection. One way to do this is to choose clothing that complies with the cold standard EN 342 and the precipitation standard EN 343.

## EN 342

Products with EN 342:2017 provide certified protection against cold. Each product with EN 342:2017 is individually certified according to different classes that describe the product's insulation value, air permeability and any waterproofing. The insulation value is stated in CLO and can be found under the product on MASCOT's website. Air permeability is described with the letters AP and is indicated in classes 1-3, where 3 is the highest class. If the product is waterproof, this will be indicated with the letters WP to the right of the symbol.

## EN 343

Products certified according to EN 343:2019 protect the user against rain. The products are tested for the level of waterproofing and breathability of the overall product. The certification has three associated values that indicate the product's waterproofing, breathability and whether the finished product has been tested under the influence of rain from above. The first two values are divided into classes from 1-4, where 4 is the highest class. The last value is indicated by either R or X, where R describes that the product has been tested.

# ***UV PROTECTION WITH*** **EN 13758-2 UPF 40**

## **Protection against the sun's UV rays**

Products certified according to EN 13758-2 provide protection against the sun's harmful UVA and UVB rays. The products are labelled with an Ultraviolet Protection Factor (UPF value) according to their protective capacity. The highest UPF that clothing can be labelled with is UPF 40+. A UPF 40+ label guarantees the user at least 97.5% UV protection. This means that a maximum of 2.5% of the sun's harmful rays penetrate the fabric.

Please note that the protective ability will decrease as the clothing wears out, if the washing instructions are not followed, or if the clothing gets wet.

# ProWash®

## WORKWEAR SUITABLE FOR *INDUSTRIAL WASHING*

ProWash® is MASCOT's designation for products that can withstand industrial washing and drying. When we state that a product can withstand industrial washing, it means that we have tested the product's ability to retain its fit, the resistance of the seams, the strength of the material, shrinkage and any colour change or transfer.

When we mark products with ProWash®, it means that the products are very durable and retain their shape and colour after repeated industrial washing.

ULTIMATE  
STRETCH

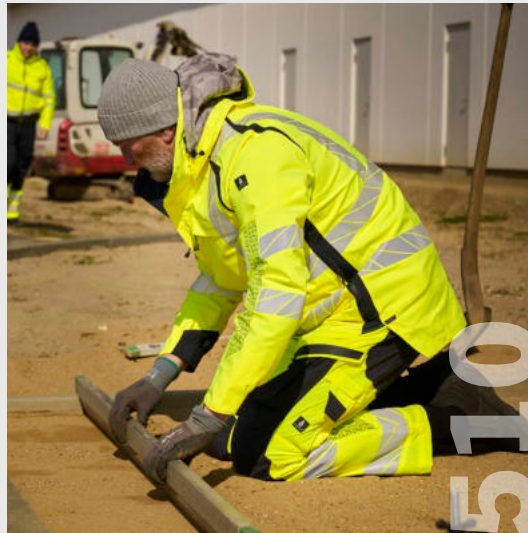

# ULTIMATE STRETCH

ULTIMATE STRETCH is our term for a material that is elastic in all directions. For workwear made with ULTIMATE STRETCH, you get highly durable workwear and a completely unique freedom of movement.

The four-way stretch workwear is so flexible that it isn't bothersome to your skin, contributing to ultimate functionality, freedom and flexibility throughout the working day.

MASCOT® SAFE products in fabric qualities 511, 510 and 711 feature ULTIMATE STRETCH.

# CLIMASCOT®

Lightweight Insulation

## *STAY WARM WITH* CLIMASCOT®

CLIMASCOT® Lightweight Insulation is an advanced lightweight lining with extremely high insulating properties. It is used in many of our winter and thermal jackets. The lining is breathable and dries quickly. In a working day with high physical activity

in a cold environment, the CLIMASCOT® lining ensures that the body can release excess heat and does not cool down and get wet. This offers the user a very high level of comfort. The lining is made from 35% recycled polyester.

# *OUTERWEAR* FOR ALL NEEDS

Whether you need an outer shell jacket, softshell jacket, fleece jacket or another type of top, we have products to suit different needs and work situations. When working in changing weather conditions, it is a good idea to choose a moisture-wicking inner layer, an insulating mid-layer and an outer layer that protects against wind and rain. All our tops are made from innovative, quality-tested materials that give the products a high level of comfort and a long life.

# *THE PERFECT HYBRID* FOR CHANGEABLE WEATHER

The softshell jacket is perfect as a transitional jacket when the weather changes. The jacket's breathable and water-repellent properties provide a high level of comfort and flexibility throughout the working day.

# TOPS WITH A ***DURABLE OUTER LAYER AND SOFT INNER LAYER***

Tops in fabric quality 771 and 781 are developed with polyester on the outside to ensure high durability and colour fastness, while the inside is made of cotton for maximum comfort against the skin. The tops also have small segmented reflectors, which contribute to good freedom of movement in the products.

# TOPS *FOR ALL NEEDS*

## QUALITY 771

*Main material: 50% polyester/50% cotton, 150 g/m<sup>2</sup>*

- Fabric with polyester on one side for both wear resistance and colour fastness and cotton on the other side, for the sake of comfort.
- Good freedom of movement with segmented, slanted reflectors.
- Tape over the sewing at the neck so the seam does not cause irritation.

# WORKWEAR FOR *WOMEN*

In MASCOT® SAFE, you will find products that have been developed and designed specifically for women with a focus on fit, quality and comfort. It is important that the clothing fits properly – also for women – to achieve the best comfort and safety in everyday life. With good comfort, there is a greater likelihood that the safety clothing will be used in the relevant situations, and the user will thus be protected in the best possible way.

Trousers, shorts and skirts for women are available in a DIAMOND fit. The fit is especially for women who have more than 20 centimetres difference between their hip and waist measurements.

In addition, you will also find tops such as T-shirts, fleece jumpers, softshell jackets, outer shell jackets and winter jackets designed for women.

# HIGH WEAR RESISTANCE WITH **CORDURA®** **REINFORCEMENTS**

High wear resistance is essential when working at a fast pace. CORDURA® is much stronger than other fabric qualities, and MASCOT uses it as reinforcement in areas where clothing is exposed to extra wear, such as knees, elbows, ruler pockets and holster pockets. By choosing products with CORDURA®, you ensure that your work trousers and jackets will last a long time.

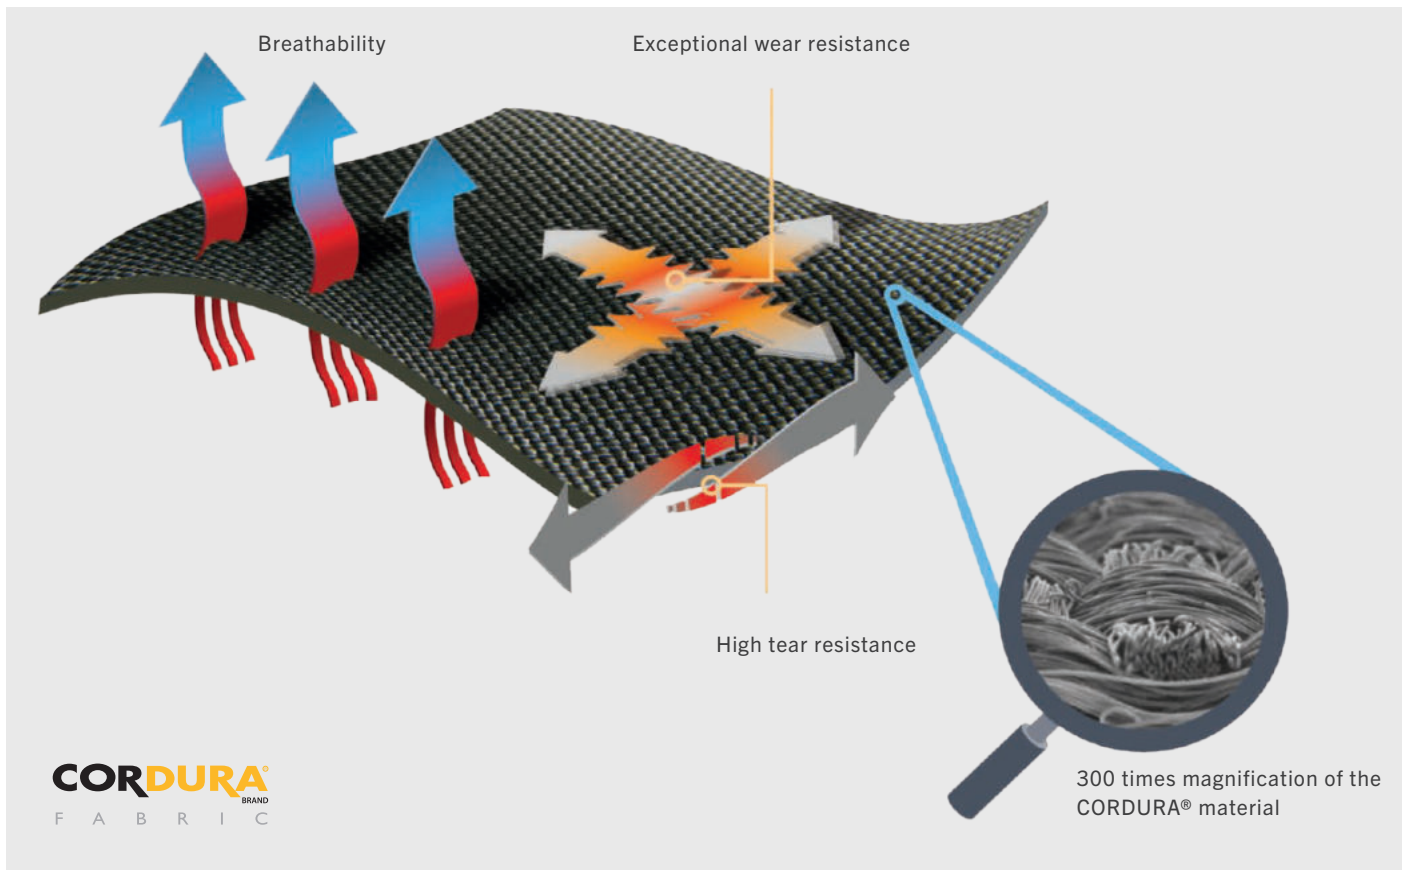

**TEAR  
STRENGTH**

**VERY  
DURABLE**

# ORDERING WORKWEAR SHOULD BE EASY

Using the online ordering and logistics platform MASCOT® SmartStore, you can define the range of products available to your employees so they are provided with the exact workwear they need. At the same time, you ensure a consistent look and a strong corporate identity – across tasks and safety requirements.

MASCOT® SmartStore can be tailored to the needs of your company and employees. The ordering system is user-friendly, and employees can order their new workwear from your defined product range at any time of the day. Errors can be reduced or eliminated, saving time for both employees and the company.

Save time with easy ordering

Fast and flexible delivery

Have your logo printed or embroidered

# MASCOT® SmartStore

# LOGO PRINTING AND EMBROIDERY

Showcase your company with logo printing or embroidery on workwear. A visible logo creates recognition and strengthens your company's visual identity.

When printing or embroidering on fluorescent safety clothing certified according to EN ISO 20471, special requirements for the size of the logo must be met in order to maintain safety certification.

Safety clothing is certified and classified according to the product's area of fluorescent material and the area of reflective material. If this area is covered by a logo larger than permitted, the certification of the clothing will lapse.

A maximum area for the size of the logo is specified for each individual garment. The logo on the front and back must not exceed 50% of the total logo area in order to maintain certification according to EN ISO 20471. See the options for logo printing on our website.

## Logo printing and embroidery integrated into your order

At MASCOT, printing and embroidery can easily be integrated as part of your workwear order. Regardless of which ordering solution you choose, it is easy to add printing or embroidery to your order, as both are handled in the same workflow as the automated picking from the high-bay warehouse.

# *TESTED TO WORK* YOUR GUARANTEE OF THOROUGHLY TESTED QUALITY\*

\*At MASCOT, we never compromise on the quality of our products. As part of our Tested to Work strategy, our products are thoroughly tested during the development process before they are launched onto the market. They are tested in our own laboratories and by our test users, who work closely with our product specialists to ensure the highest level of functionality, freedom of movement and durability. This comprehensive testing process ensures that every product meets our high standards for quality and functionality.

# ***SA8000-CERTIFIED IN-HOUSE PRODUCTION*** YOUR GUARANTEE OF WORKWEAR PRODUCED UNDER DECENT CONDITIONS\*

\*With our production in the Far East, we have a social responsibility, and we take it seriously. The employees at our factories in Vietnam and Laos work in a European work culture under proper conditions. Our documentation shows that our factories are SA8000 certified – one of the most recognised certifications in the field. It is a guarantee to the outside world and our own employees of a safe and secure working environment and good working conditions adapted to local conditions.

# OUR LONG-TERM GOAL IS *CIRCULARITY*\*

\*At MASCOT, we are working to integrate circularity into our products. Our long-term goal is for used and worn workwear to be used as raw material in the production of new workwear. When working towards a circular economy, we are guided by the objectives of the EU's Textile Strategy and incorporate experience and input from our participation in standardisation committees for circular textiles.

# 100% RECYCLED *POLYESTER* AND *POLYAMIDE*\*

\*MASCOT has decided to phase out the use of virgin polyester and polyamide throughout our product range. By mid-2025, we had made such progress with the transition that 75% of the fabrics we purchase now consist of recycled materials. The implementation is ongoing, so materials that have already been purchased will be used first. The remaining qualities will be converted as we develop fabrics using recycled materials that meet our high standards for quality and durability.

# A POSITIVE FOOTPRINT

At MASCOT, we work to reduce our consumption and our waste – and we do so by considering our entire supply and value chain. This holistic approach allows us to reduce consumption where it is most optimal to do so while holding back in places where taking action may hurt other parts of the value chain. It is not individual efforts that count, but the overall picture.

## Suppliers and business partners

We work with all suppliers to reduce the use of chemicals and water in general. We also always select suppliers according to their environmental profile, and the vast majority of our fabrics come from suppliers who have both Bluesign® and ISO 14001 certifications.

## Responsible production

We produce the vast majority of our workwear ourselves at our two SA8000-certified factories in Vietnam and Laos. The SA8000 certification is a guarantee to the outside world and our own employees that we have a safe and secure working environment and offer good working conditions adapted to local conditions.

## Workwear with long-lasting durability

We produce long-lasting workwear and safety footwear with responsibility for the environment and people. Long durability means that, over time, the user needs to buy fewer products. Meanwhile we reduce our overall resource consumption because we produce fewer products over the same period of time.

## Logistics with care

Our production is based in Vietnam and Laos and in our main warehouse in Denmark. The vast majority of our products are transported between Asia and Europe using modern container ships. We only work with shipping companies that are planning to convert their fleet from diesel engines to liquefied natural gas (LNG).

A black and white photograph of a woman with dark hair, wearing a small flower hair clip, focused on sewing at a machine in a factory setting. Other workers and sewing machines are visible in the background.

“

We invest in people and the environment in our supply chain, and we are highly conscious of the fact that we operate in an industry that has a large impact on the climate, and where we must fundamentally change the way we make our products.

*Michael Grosbøl, CEO and owner of MASCOT.*

## An all-in-one solution

The world's best workwear and safety footwear are more than just the products. At MASCOT, you are guaranteed great customer service, efficient logistics and high delivery reliability.

## Time-saving ordering

With MASCOT® SmartStore you avoid spending unnecessary time on clothing- and footwear orders. The logistics and ordering system makes ordering and order management easy, fast and flawless.

## A global solution

Does your company have employees based in multiple countries? MASCOT makes workwear and safety footwear sourcing simpler with one global sourcing solution for your business.

## High security of supply

More than 98% of all orders are dispatched from our state-of-the-art, fully automated logistics centre within 24 hours. We also use some of Europe's largest and most reliable freight carriers, ensuring that shipments reach our customers quickly.

## Printing and embroidery

No matter which products you choose, adding transfer printing or embroidery could not be easier. MASCOT does it in-house, which helps keep delivery time down.

## Individual adjustment

Does your company have special requests or require other individual customisations? MASCOT offers bespoke solutions so you always get the workwear that matches your needs and wishes.
