# Explore new solutions.

**SNICKERS WORKWEAR** is forward thinking and solution driven. Innovation is a hallmark of our products, and we start with real-world challenges. They are our roadmap to developing workwear with better functionality, durability and safety. Workwear that makes a hard day's work easier.

Our commitment extends beyond creating functional, durable and stylish solutions; we aim to revolutionise the workwear industry with a focus on sustainability, where durability becomes our guiding principle.

When you put on Snickers Workwear trousers or a jacket, you are at the forefront of your industry. It's based on our heritage of 50 years of innovation, proven time and time again in our products.

# The all new high-vis. Tuned for comfort.

You show up when the rest of the world is still asleep. You brave the elements, and deserve gear that always delivers. The all-new High-Vis is engineered for comfort. It's designed for performance. Because when the job is tough, your workwear shouldn't be. It's high-vis to be seen and high-tech to keep you going.

6218 AllroundWork  
Stretch Trousers Holster Pockets

# Welcome to the future of work trousers.

Engineered with recycled + bio-based materials, designed for freedom of movement, and styled for a new generation. Durable where it counts, flexible where it matters.

These next-generation trousers are the ultimate all-round trousers. They offer incredible comfort with 4-way stretch fabric, are built with mini ripstop and CORDURA® reinforcements, holster pockets, and a sporty look.

Inner mobile pocket  
in left cargo pocket.

CORDURA®-reinforced  
holster pockets with  
zipped compartment.

Unmatched comfort  
and flexibility with  
4-way stretch fabric.

CORDURA®-reinforced  
knee pockets and mini  
ripstop for durability.

More use of sustainable material:  
35% Sorona fiber in main fabric and 94%  
recycled polyamid in contrast fabric.

**Perfect  
workwear  
for less than  
perfect days.**

A close-up, low-angle shot of a man's face, partially obscured by a dark hood. He is looking down, and his face is wet with rain. The background is dark and filled with falling rain, creating a dramatic and moody atmosphere.

Our wide range of functional work jackets for both men and women will keep you comfortable, no matter what the weather throws at you. Designed to make your job easier with innovative solutions and durability.

So, whether it rains, freezes or snows, the perfect workwear has you covered. We have a wide selection of sizes and models, from padded winter work jackets to softshell jackets and high visibility garments.

# How to work efficiently and safely in the heat and sun.

Working in a hot, sunny climate can be tough. But there's workwear that can help protect you from sunburn, dehydration and fatigue. Here's a quick guide to getting ready for a hard day's work:

## Avoid the sun

### UV protective workwear is key.

In the construction industry, safety is always a priority, but sometimes it's inevitable to be exposed to strong sunlight. If you find yourself in this situation, you need to stay covered — protecting your head, arms and legs without getting too hot.

We have a series of garments with tightly woven fabrics that offer up to UV protection factor 50, but they are lightweight, breathable and moisture-wicking, so they feel cooler than a cotton t-shirt and shorts.

## Stay cool and dry

### Lightweight and ventilated fabrics.

Staying hydrated is obviously the most critical thing. But as the temperature rises, it's also essential to dress correctly. Lightweight fabrics and materials offer better ventilation and dry faster when wet from perspiration.

Our LiteWork range of workwear is specifically designed for warmer climates using specially selected, durable yet lightweight fabrics. Examples include the 37.5® technology in our workwear. Active particles help your body maintain an ideal core temperature by removing perspiration vapour before it turns into liquid sweat.

# How to layer work clothes in wet and cold weather

Craftspeople who work outdoors during the wet and cold seasons face unique challenges, requiring durable and functional layering solutions to stay warm, dry, and comfortable while maintaining productivity. Here's a quick guide to combining waterproof work jackets with mid layers and a moisture wicking base layer.

## Base layer

### Moisture-Wicking

The most important feature for your base layer is to wick moisture away from your body, keeping you dry and comfortable. Things to consider when you choose base layer is your activity level and the temperature your working in. Materials like wool or synthetic fabrics is great for their moisture-wicking properties. Avoid cotton as it traps moisture, leaving you cold and damp.

## Mid layer

### Insulation

The main purpose of mid layers is to insulate and trap heat. We recommend fleece or synthetic jackets, which are lightweight and retain their thermal properties even when wet. Choose the thickness of your mid layer according to the temperature and your level of activity. The midlayer is the key to good layering, as it can act as an outer layer if you get too warm in dry conditions, or be removed in wet conditions.

## Outer layer

### Waterproof and Windproof Shell

The outer layer is your barrier against wind and rain, and the most important layer to stay comfortable in wet and cold conditions. A water resistant jacket will keep you dry unless you're working for hours in heavy precipitation, in which case you'll need a waterproof jacket with taped seams to keep water out. In freezing temperatures you should opt for an insulated and water resistant outer layer with high neck and adjustable hood and cuffs.

A man with short dark hair, wearing a dark t-shirt and dark pants with yellow accents, is sitting on a dark ledge. He is looking off to the side with a thoughtful expression. The lighting is dramatic, with strong highlights and deep shadows.

# How to find your fit & size

## TOPWEAR

When it comes to workwear, the right fit makes all the difference. Our topwear garments — including base layers, t-shirts, fleece jackets, and more — are divided into four fit categories. Ranging from tight to loose, each is designed for comfort, freedom of movement, and safety.

### **Body fit**

Our tightest fit with a body-hugging feel. These garments, such as base layers, are made exclusively from stretch materials, designed to be worn close to your body like a second skin.

### **Slim fit**

Quite a tight fit that offers a slimmer silhouette and stays close to your body—without feeling restrictive.

### **Regular fit**

A classic fit. Sits comfortably, allowing space for air between your body and the garment.

### **Loose fit**

Our most generous fit: wider and airier with an oversized look.

## **TROUSERS**

Finding the right fit in workwear trousers is a matter of safety, comfort, and protection. The right size and fit are, for example, crucial to keeping your kneepads in the correct position to protect your knees. Snickers Workwear offers three different fits — Slim fit, Regular fit, and Loose fit — as well as one of the widest size ranges in the industry.

With 70 different trouser sizes and five leg lengths available, you can be sure to find a pair that fits your body perfectly, ensuring optimal protection. Special sizes are also available. Delivery may take slightly longer, but it's worth the wait.

### **Slim fit**

Slim fit trousers are figure-hugging and quite tight, giving you a slimmer look. However, they are also soft, stretchy and follow your every move.

### **Regular fit**

These trousers follow your body shape but are not tight. There is room for air between the garment and your body.

### **Loose fit**

The loose fit trousers sit securely at the waist while the legs are wider and airier. All trousers in the 3-series have loose fit.

**Always choose  
better**

We are committed to driving real change towards a sustainable future. Our guiding principle — Always choose better — is rooted in our proud heritage, with sustainable at the core of what we do — and it shapes our journey ahead.

Everything we do is for the working professionals who put our clothes to the test — those who build, repair, protect and move, keeping society evolving, today and for generations to come. But we also do it for the people who make our products and for the planet they are made on.

That's why our work is centered on four impact areas: Performance, Materials, Climate and Collaboration. We design for the long run, work with materials that last, build partnerships that make a difference and reduce our footprint step by step.

Stretchy, durable and comfortable one-piece work trousers with CORDURA® reinforcements and holster pockets for secure storage. Built for freedom of movement, they're ideal for tough tasks.

These versatile one-piece trousers with holster pockets combine durability with functionality, making them perfect for demanding work environments. Crafted from mechanical stretch fabric, they have flexible panels at the back and thighs for enhanced freedom of movement. CORDURA® reinforcements at the knees, holster pockets, and a ruler pocket offer durability, while the KneeGuard™ system provides certified (EN 14404) protection. With pre-bent legs and a regular fit, these trousers provide all-day comfort. The design includes tool holders, multiple pockets—including two chest pockets with pen compartments and knife attachments—and adjustable shoulder straps for a perfect fit.

- Mechanical stretch fabric with CORDURA® reinforcements
- 4-way stretch materials for flexibility and comfort
- KneeGuard™ system (EN 14404) for certified knee protection
- Holster pockets, ruler pocket and tool holders
- Chest and cargo pockets for tool storage
- Adjustable shoulder straps for a tailored fit

- Convenient design — easy to pull on

**MATERIAL:** Main: 100% Polyester 190 g/m<sup>2</sup>

Fits with 8200 Rain Jacket, PU

# Protect your knees for life.

Did you know that craftsmen and craftswomen exert more pressure on their knees than many top athletes? That's why knee injuries are more common for trade professionals than for those in other occupations. So, whether you occasionally kneel indoors or spend extended periods on your knees, using the best possible kneepads are essential.

At Snickers Workwear, we've developed three innovative kneepad systems that will shield you from both short- and long-term injuries: KneeGuard™, SquareFit™ and Capsulized™ — the world's first built-in certified kneepads.

KneeGuard™

SquareFit™

Always look for the KneeGuard™ or SquareFit™ symbol on your trousers to match them correctly with your KneeGuard™ or SquareFit™ kneepads.

## 9127 Strapped Kneepad Pockets

Lightweight, adjustable kneepad pockets for use with shorts or over trousers. Made for interchangeable kneepads, they offer reliable knee protection, all-day comfort, and are easy to take on and off.

New!

0400

Size: One size

The Strapped Kneepad Pockets offer lightweight, durable knee support for craftsmen and craftswomen, even when wearing shorts. They feature changeable kneepads to extend the lifespan of the product and Kevlar reinforcement for extra durability. Designed to be worn on bare skin or over trousers, they provide flexibility in any work situation that calls for comfortable, reliable, and easy-to-attach knee support while reducing pressure and abrasion. Adjustable straps ensure a secure fit, making them ideal for everyday use. They also come with a wash bag for easy cleaning.

When you buy the 9127 Strapped Kneepad Pockets, the 9128 PowerFoam Kneepads are included. The 9128 PowerFoam Kneepads are also available for purchase separately. The 9127 Strapped Kneepad Pockets can also be used together with 9169 D3O® Ergo Craftsmen Kneepads.

- Certified accordingly to EN 14404
- Easy and quick to attach
- Kevlar reinforcement for durability
- Changeable kneepads to prolong lifespan
- Suitable for use with shorts or trousers
- Adjustable fit for personalized comfort

**MATERIAL:** Main: 53% Polyester 34% EVA 7% Elastane 6% Polyethylene  
**Reinforcement:** 70% Polyamide 18% Aramid 12 % Elastane **Lining:** 100% Polyamide

## 9127 Strapped Kneepad Pockets

— Lightweight, adjustable kneepad pockets for use with shorts or over trousers.

## 9128 PowerFoam Kneepads

Ergonomic, lightweight kneepads designed for reliable and comfortable knee protection. Featuring advanced multi-layer foam technology and a digitally printed outer fabric, they provide all-day comfort.

**New!**

9104

Size: One Size

Designed for professionals who spend hours on their knees, these advanced kneepads feature a multi-layer construction that absorbs and dissipates impact. Made with durable and protective layers of foam, they provide the perfect balance of cushioning and support. These kneepads are certified for use with 9127 Strapped Kneepad Pockets and are compatible with trousers featuring our KneeGuard™ system. They have an ergonomic design with a tight and secure fit, optimized for slim-fit trousers. The outer fabric is digitally printed, and the kneepads are washable for easy maintenance. Each pair comes packaged in a wash bag.

- EN 14404-3:2024 Type 2 Level 1 knee protection
- Combination of materials for force distribution and penetration protection
- Compatible with the KneeGuard™ system
- Ergonomic design for a tight and secure fit optimized for slim-fit trousers
- Washable and easy to maintain
- Multi-layer construction with a foam core

**MATERIAL:** Main: 100% Polyurethane. Shell: 78% Polyester, 22% Elastane. Lining: 100% Polyamide.

## 9122 Ergonomic Kneepads

Ergonomic kneepads offering advanced knee protection during work that involves frequent kneeling. A curved, lightweight and flexible design reduces strain and ensures everyday working comfort.

0604

Size: One Size

Lightweight kneepads with ergonomic shape offering advanced knee protection. With an EN 14404 Type 2 Level 1 certification, the kneepads are built for frequent kneeling in dynamic work environments, protecting against various debris on the floor. EVA material provides flexibility while a pre-curved design ensures the pads stay in place for continuous comfort. In addition, the pads provide great force distribution and penetration protection while they comfortably conform to the knees.

- EN 14404 Type 2 Level 1 knee protection
- Lightweight and flexible EVA material
- Ergonomic design for a tight and secure fit optimized for slim-fit trousers
- Compatible with the KneeGuard™ system
- Combination of different materials for force distribution and penetration protection

**MATERIAL:** Main: 50% Ethylene-vinyl acetate (EVA), 50% Polyethylene (PE)

## 9169 D3O® Ergo Craftsmen Kneepads

Ergonomically shaped kneepads offering advanced knee protection for work that involves frequent kneeling. Designed for everyday use, the pads are made of durable D3O® material that provides enhanced impact protection.

0500

Size: One Size

Technically advanced kneepads with an ergonomic design ensuring that the pads are always in the right position for optimal knee protection. Made of durable and flexible D3O® material, the pads offer enhanced impact protection. The kneepads come with an EN 14404 Type 2 Level 1 rating to guard against pebbles, nails and various floor debris. In addition, the knee pads are machine-washable, which means you don't have to remove the pads when washing your work trousers. Designed to fit Snickers Workwear KneeGuard™ system.

- D3O® material for enhanced impact protection
- EN 14404 Type 2, Level 1 knee protection
- Retains shape for extended periods of frequent kneeling
- Ergonomic design for a tight and secure fit that matches perfectly with our Slim Fit trousers
- Compatible with the KneeGuard™ system
- Machine-washable

**MATERIAL:** Main: 100% Polyurethane (PU)

## 9110 Craftsmen Kneepads

0604

**Kneepads offering advanced knee protection during work that involves frequent kneeling. Designed to reduce strain, the lightweight, flexible and durable kneepads provide everyday working comfort.**

Size: One Size

Lightweight kneepads featuring advanced knee protection and a comfortable fit. With an EN 14404 Type 2 Level 1 rating, the pads have been specifically designed for frequent kneeling in mobile work environments, guarding against pebbles and various debris on the floor. EVA material allows for a lightweight and flexible construction to ensure the kneepads are comfortable and easy to wear. In addition, a soft interior conforms to the knee, keeping the kneepads in place and distributing the pressure evenly while kneeling.

- EN 14404 Type 2 Level 1 knee protection
- EVA construction
- Lightweight and flexible design
- Compatible with the KneeGuard™ system

**MATERIAL:** Main: 50% Ethylene-vinyl acetate (EVA), 50% Polyethylene (PE)

## 9191 XTR D3O® Craftsmen Kneepads

0405

**Advanced knee protection for work that involves extended periods of frequent kneeling. D3O® material retains the shape for long durations while offering extra impact protection. A lightweight design and supportive ventilation provide flexibility and comfort.**

Size: One Size

Craftsmen kneepads that feature advanced knee protection for extended periods of frequent kneeling. An EN 14404 Type 2 Level 1 rating guards against pebbles, nails and various debris during work that requires mobility. The pads are made of the innovative D3O® material that offers enhanced impact protection and retains its shape for long durations. In addition, a curved and highly durable construction ensures the kneepads stay securely in place for continuous comfort, while the interior conforms to the knee and distributes pressure when kneeling.

- EN 14404 Type 2 Level 1 knee protection
- D3O® material for impact protection
- Retains shape for extended periods of frequent kneeling
- Ergonomic design for stability and flexibility
- Durable and long-lasting design

**MATERIAL:** Main: 100% Polyolefin

## 9112 D3O® Lite Craftsmen Kneepads

1400

**Kneepads offering advanced knee protection during work that involves frequent kneeling. Designed to reduce strain during everyday use, the D3O® LITE material provides impact protection, ventilation and a lightweight construction.**

Size: One Size

High-tech kneepads featuring advanced knee protection with enhanced impact protection. Boasting an EN 14404 Type 2 Level 1 rating, the pads have been specifically designed for frequent kneeling in mobile work environments, guarding against pebbles and various debris on the floor. D3O® LITE material offers impact protection and shock absorption, while a curved, lightweight construction paired with a ventilating design ensures the kneepads are comfortable and easy to wear. In addition, a soft interior conforms to the knee, keeping the kneepads in place and distributing the pressure evenly while kneeling.

- EN 14404 Type 2 Level 1 knee protection
- D3O® LITE material for enhanced impact protection
- Ergonomic design for ventilation and stability
- Curved, lightweight design
- Durable and long-lasting design

**MATERIAL:** Main: 100% Polyolefin

## 9116 Kneepads FR

For full protection against heat and flame, wear these flame-retardant kneepads together with our trousers. The advanced kneepads feature vertical and horizontal cut lines for optimal flexibility and fit during intense work. Fit and certified together with all ProtecWork trousers.

0404

**Size:** One size  
(120x200mm)

Advanced kneepads offering certified flame resistance and knee protection for safe work in high-risk environments. The kneepads are certified according to EN ISO 14116 and come with an EN 14404 Type 2 Level 1 rating to guard against pebbles, nails and various floor debris. In addition, the multilayered kneepads are made of a soft and comfortable rubber material laminated with CORDURA® for extra durability. The pads also feature vertical and horizontal cut lines to ensure a flexible fit that adapts to the moving body. Compatible with the KneeGuard™ system and is certified together with all ProtecWork trousers.

- Flame protection
- Soft and comfortable material
- Laminated with CORDURA® for extra durability
- Horizontal and vertical cut lines for a flexible fit
- Compatible with the KneeGuard™ system

**MATERIAL:** Main: 100% EPDM rubber.  
Reinforcement: 100% CORDURA®

## 9118 Floorlayer Kneepads

Kneepads offering advanced knee protection during work that involves extended periods of kneeling. Polyethylene comfort beads ensure the pads keep their shape over time, while a lightweight and breathable design provides comfort and stability.

0408

**Size:** One Size

Floorlayer kneepads that provide advanced knee protection during extended periods of kneeling. The pads' EN 14404 Type 2 Level 1 rating ensures you stay protected during extended hours on your knees and while engaged in work that requires mobility. Polyethylene comfort beads provide a breathable and lightweight construction and retain their shape over extended periods of time for optimal protection. In addition, ergonomic design combined with a soft interior make sure the kneepads stay in place and that the pressure is distributed evenly.

- EN 14404 Type 2 Level 1 knee protection
- Polyethylene comfort beads retain shape for extended periods
- Lightweight and breathable design

**MATERIAL:** Main: 85% Polyamide, 15% Polyester

## 9119 D3O® Lite Floorlayer Kneepads

Advanced knee protection for work that involves extended periods of kneeling and repeated impacts. D3O® LITE material retains the pads' shape for long durations while offering enhanced impact protection.

0414

**Size:** One Size

Lightweight floorlayer kneepads with advanced knee protection designed for work that includes extended periods of kneeling. Boasting an EN 14404 Type 2 Level 1 rating, the pads guard against pebbles, nails and various debris during work that requires mobility. Made of the innovative D3O® LITE material, the kneepads offer impact protection and shock absorption while retaining its shape for long durations. In addition, a curved design ensures the kneepads stay securely in place, while the interior conforms to the knee and distributes pressure.

- EN 14404 Type 2 Level 1 knee protection
- D3O® LITE material for enhanced impact protection
- Retains shape for extended periods of work
- Ergonomic design for ventilation and stability
- Durable and long-lasting design

**MATERIAL:** Main: 100% Polyolefin

## 1955 FlexiWork Stretch Jacket

Made from a full 4-way stretch fabric, this jacket provides unmatched flexibility, warmth, and waterproof protection. With a sporty, modern look, it has CORDURA®-reinforcements and a power pocket.

**New!**

0404

CE

**Fit:**  
Regular

**Size:**  
XS-3XL

Crafted for project leaders, managers, and construction professionals, this waterproof jacket is built to withstand harsh winter conditions with ease. Made from a fully laminated shell fabric with stretch lining, it offers excellent freedom of movement. For added warmth and durability, it includes REPVE™ padding and CORDURA® sleeve reinforcements, while 3D mesh at the back provides ventilation. Key features include a detachable, adjustable hood, welded waterproof details, and a power pocket with Aerogel insulation to extend device battery life in cold weather. Reflective details enhance visibility, while pre-bent sleeves, a dropped back hem, and adjustable cuffs with thumbholes ensure comfort and protection. For convenience, the jacket includes two aqua guard chest pockets, side pockets, and interior storage with pen compartments. In addition, it is certified according to EN342 and EN343.

- 4-way stretch fabric and lining for ultimate flexibility
- Waterproof with taped seams
- REPVE™ insulation and CORDURA® reinforcements for durability
- Reflective details for enhanced visibility
- Exterior pockets: Power pocket with PrimaLoft Gold Aerogel insulation for battery life protection in cold conditions, 2 zipped side pockets, 1 zipped chest pocket
- Interior pockets: 2 pen compartments, 1 zipped chest pocket, 2 large stow pockets

**MATERIAL:** Main: 88% Recycled Polyamide, 12% Elastane 217 g/m², Contrast: 88% CORDURA® Polyamide (PA), 12% Elastane 300 g/m², Lining: 100% T400 Polyester 82 g/m², Padding: 90% REPVE™ Polyester (PES), 5% Polyester (PES), 5% Recycled Polyester (PES) 160 g/m²

**SUSTAINABILITY:** Recycled Polyamide (PA) / Recycled Polyester / REPVE™ Polyester

## 1112 AllroundWork Waterproof Insulated Jacket

## 1104 AllroundWork Waterproof Insulated Jacket

Stay comfortable and dry with this lightweight, insulated, waterproof jacket. Designed for all-weather protection, it features a detachable, roll-in hood and durable fabric for everyday use.

**New!**

5804

CE

**Fit:**  
Regular

**Size:**  
XS-3XL

This versatile, insulated and waterproof jacket is perfect for year-round wear. Lightweight, windproof, and fully-lined, it offers protection in wet and windy conditions. The breathable 2-layer waterproof fabric, complete with fully taped seams, ensures great comfort and durability. It is designed with pre-bent sleeves for mobility and features a detachable, adjustable roll-in hood that can be stored in the collar. The extended back hem provides added wind protection, while drawstrings at the hood and hem allow for a custom fit. Multiple inner and outer pockets keep essentials secure, and adjustable sleeve ends add extra convenience. Certified to both EN342 and EN343 standards, this jacket is built for everyday use across various industries, from general construction to transport and facility management.

- Insulated for warmth and comfort
- Waterproof 2-layer fabric with taped seams
- Folded inner placket at front to keep water out
- Inner pockets: One zipped chest pocket, two pen pockets, one stow pocket.
- Outer pockets: Two zipped front pockets, one zipped chest pocket.
- Adjustable and detachable roll-in hood

**MATERIAL:** Main: 100% Polyester 136 g/m<sup>2</sup>, Contrast: 100% Polyester 136 g/m<sup>2</sup>, Padding: 90% REPREVE® Polyester (PES), 5% Polyester (PES), 5% Recycled Polyester (PES) 120 g/m<sup>2</sup>, Lining: 100% Solution Dyed Polyamide 65 g/m<sup>2</sup>

## 9913 Wash-In Textile Waterproofing.

Launched in collaboration with OrganoTex®, this is an easy-to-use, biodegradable, and PFAS-free treatment for reproofing water-repellent textiles. The treatment is not to be used on flame-retardant protective wear or other garments certified to PPE Regulation (EU) 2016/425 category III.

An effective treatment for restoring water-repellent properties to washed and worn garments without effecting their colour, texture, or breathability. Easily applied in short washing machine cycle, best results are achieved on synthetic materials such as polyester and polyamide. The treatment is not to be used on flame-retardant protective wear or other garments certified to PPE Regulation (EU) 2016/425 category III.

- Biobased and readily biodegradable according to OECD 301F.
- Free from fluorocarbons (PFC/ PFAS), fossil-based polymers and synthetic waxes
- Eco-labelled with OEKO-TEX Eco Passport
- 500 ml bottle sufficient for 5 to 7 garments
- Safety data sheet is available upon request

## 1229 AllroundWork Softshell Jacket with Hood

Hardwearing softshell work jacket with hood built for use all year round. The work jacket offers reliable working comfort and protection against elements in harsh working environments.

9504

0404

5804

**Fit:**  
Regular

**Size:**  
XS-3XL

Versatile softshell work jacket with a hood that makes you ready for everything in various working conditions. The windproof and water-repellent jacket features CORDURA®-reinforced elbows and pre-bent sleeves, offering working comfort as well as protection and durability. In addition, dropped back and sleeve ends ensure protection in all working positions while bottom hem adjustment provides flexibility. YKK 2-way zipper makes it possible to open the jacket from below for access to tools underneath and for enhanced range of movement when necessary. Furthermore, extra functionality is provided by an ID-badge holder inside a zip chest pocket. Suitable for profiling.

- Windproof and water-repellent softshell fabric
- CORDURA®-reinforced elbows
- Pre-bent sleeves
- Elastic cord adjustment at bottom hem for a stretchy, tight fit
- Hood for extra protection
- YKK 2-way zipper

**MATERIAL:** Main: 100% polyester, 265 g/m².  
**Reinforcement:** 100% polyamide CORDURA®, 205 g/m².

## 1905 AllroundWork Windstopper Fleece Lined Jacket

The ultimate softshell jacket, offering lightweight, windproof protection and freedom of movement. With reflective details and multiple pockets, it's perfect for professionals in any season.

5800

**New!**

0400

3100

9500

**Fit:**  
Regular

**Size:**  
XS-3XL

This versatile jacket combines windproof 2-layer softshell fabric with an extremely comfortable, fully-stretch Polartec® Shed Less fleece lining. The padded sleeves provide extra warmth in cooler weather, while the adjustable straps at the cuffs help block out wind. Reflective elements on the sleeves, back collar and zipper pullers ensure visibility, making this jacket a practical choice for carpenters, electricians, and facility managers across various industries. The brushed tricot chin guard and high fleece-lined collar enhance comfort and wind protection. Multiple pockets—including two zipped front pockets, a zipped chest pocket, and two spacious interior stow pockets—offer convenient storage for all your essentials.

- Windproof and water-repellent 2-layer softshell
- Polartec® Shed Less fleece lining reduces textile shedding by 85% during home laundry
- Reflective details enhance visibility and safety
- High fleece-lined collar for comfort and wind protection
- Inner pockets: one pen pocket, two large stow pockets
- Outer pockets: one zipped chest pocket, two zipped front pockets

**MATERIAL:** Main: 88% Polyester, 12% Elastane 160 g/m².  
**Lining:** 100% Recycled Polyester 159 g/m², **Lining:** 100% Solution Dyed Polyamide 65 g/m², **Padding:** 90% REPREEVE® Polyester (PES), 5% Polyester (PES), 5% Recycled Polyester (PES) 80 g/m²

**SUSTAINABILITY:** Recycled Polyester / REPREEVE® Polyester / Solution Dyed Polyamide (PA)

## 1205 AllroundWork Windproof Softshell Jacket

0400

0900

3100

5800

9500

Windproof stretch softshell jacket built for most types of work and everyday use. A clean, stripped-down design makes the jacket perfect for profiling.

Fit: Slim

Size: XS-3XL

Versatile softshell jacket made of windproof, stretch fabric that offers plenty of space for profiling at both front and back. The jacket features a high collar that protects against wind and cold air, elastic drawcord at bottom hem for optimal fit, hook-and-loop closure at cuffs and two front pockets with zipper.

- Windproof softshell fabric.
- Big areas for profiling at front and back.
- High collar.
- Elastic drawcord at bottom hem.
- Hook-and-loop closure at cuffs.
- Two front pockets with zipper.

MATERIAL: Main: 88% polyester, 12% elastane, 218 g/m<sup>2</sup>.

## 4505 AllroundWork Windproof Soft Shell Vest

Versatile softshell vest that provides protection from cold wind during everyday use. A clean design makes the vest suitable for profiling.

5800

0400

9500

Fit: Regular

Size: XS-3XL

An everyday-use soft shell vest that enables quick and easy layering-up in changing weather conditions. The vest is made of a windproof and fluorocarbon-free water-repellent stretch fabric and features high collar and dropped back hem to protect against cold wind in all working positions. In addition, the vest comes with elastic drawcord at bottom hem for optimal fit, two-way front zipper for increased ventilation, two front pockets with zipper, and plenty of space for profiling.

- Windproof and water-repellent stretch softshell fabric
- Dropped back hem for wind protection in all working positions
- High collar for extra wind protection
- Elastic drawcord at bottom hem
- Large areas for profiling at front and back
- Two zip pockets

MATERIAL: Main: 88% polyester, 12% elastane, 218 g/m<sup>2</sup>.

## 8102 AllroundWork Packable Liner Jacket

A lightweight and soft insulated jacket that neatly packs into its own pocket, designed with reflective details. This style is perfect as a midlayer under a shell jacket in colder weather.

0400

Fit: Regular

Size: XS-3XL

This sporty and comfortable mid-layer jacket has a soft, down-like padding and can be compactly packed into its own stow pocket. Designed with reflective details and zipped side pockets. In addition, it has a handy zipped outer chest pocket.

- Lightweight, packable design
- Outer zip chest pocket
- Inner stow pocket
- Roomy zip side pockets

**MATERIAL:** Main: 100% recycled polyamide, 40 g/m<sup>2</sup>. Lining: 100% recycled polyamide, 38 g/m<sup>2</sup>. **Insulation:** 100% recycled polyester (60% Sorona® polyester, 40% polyester), 80 g/m<sup>2</sup>.

**SUSTAINABILITY:** Recycled Polyamide (PA) / Recycled Polyester / Sorona® Polyester

## 8102 AllroundWork Packable Liner Jacket

Ideal for work on the move – a lightweight, packable jacket that fits in its own pocket.

## 4502 AllroundWork Packable Liner Vest

A lightweight, soft, and insulated vest that conveniently packs into its own pocket. In cold weather, this sporty style is the perfect midlayer beneath a shell jacket.

0400

Fit: Regular

Size: XS-3XL

With its timeless, quilted design, this versatile vest offers comfort in any temperature. Equipped with multiple pockets, it can be compactly packed into its own stow pocket. Soft and lightweight, this vest has a down-like padding and is the ideal mid-layer.

- Lightweight, packable design with down-like padding
- Outer zip chest pocket
- Inner stow pocket
- Roomy zip side pockets
- 2-way zipper

**MATERIAL:** Main: 100% recycled polyamide, 40 g/m<sup>2</sup>. Lining: 100% recycled polyamide, 38 g/m<sup>2</sup>. **Insulation:** 100% recycled polyester (60% Sorona® polyester, 40% polyester), 80 g/m<sup>2</sup>.

Women's  
fit

0904

0404

Insulated women's work jacket that keeps you warm in cold conditions. Repreve® insulation and 37.5° technology combine to provide efficient body-temperature management during intense work.

Fit: Slim

Size: XS-2XL

Versatile work jacket with Repreve® polyester insulation offering smooth warmth and comfort in cold conditions. The jacket also features the innovative 37.5° technology that provides extra ventilation for efficient body-temperature management even during intense work. Stretch panels add durability and flexibility, making this jacket a great choice for most types of work.

- Durable polyamide fabric
- Repreve® polyester insulation
- 37.5° technology for moisture management
- Stretch panels for mobility and durability
- Pre-bent sleeves
- Women's fit

**MATERIAL:** Main: 100% Polyamide 67 g/m<sup>2</sup>, **Reinforcement:** 88% CORDURA® Polyamide, 12% Elastane 275 g/m<sup>2</sup>, **Padding:** 50% 37.5 Recycled Polyester, 50% Polyester 160 g/m<sup>2</sup>, **Stretch:** 90% Solution Dyed Recycled Polyester, 10% Elastane 253 g/m<sup>2</sup>

**SUSTAINABILITY:** 37.5° Recycled Polyester / Solution Dyed Recycled Polyester

### 4512 AllroundWork 37.5° Insulator Vest

0404

0904

9504

An all-purpose insulator vest that makes a great companion in both cold and mild weather conditions. Combining the innovative 37.5° technology with warming insulation, the vest works both as a mid- and outer layer.

Fit: Slim

Size: XS-3XL

Versatile insulator vest suitable for everyday use in various environments. The insulated vest is designed to offer reliable protection in cold climates and features 37.5° technology for enhanced moisture management. In addition, the vest is built with stretch fabric to ensure flexibility and ease of movement.

- 37.5° technology for enhanced moisture management
- Stretch panels
- Insulation for extra warmth in cold environments
- Water repellant

**MATERIAL:** Main: 100% Polyamide 67 g/m<sup>2</sup>, **Padding:** 50% 37.5 Recycled Polyester, 50% Polyester 160 g/m<sup>2</sup>, **Stretch:** 90% Solution Dyed Recycled Polyester, 10% Elastane 253 g/m<sup>2</sup>

**SUSTAINABILITY:** 37.5° Recycled Polyester / Solution Dyed Recycled Polyester

### 1902 FlexiWork Hybrid Jacket

Elastic and versatile work jacket that fills the gap between a sweatshirt and an insulated garment, making it a great choice for general construction work in various temperatures.

0404

5898

9545

Fit: Slim

Size: XS-3XL

REPREVE

Multi-purpose work jacket made of flexible, wicking jersey fabric and Repreve® insulation at shoulders and upper body. The result is an elastic jacket that provides freedom of movement and extra warmth in critical areas for all types of work in a wide temperature span. The design of the sleeves provides enhanced mobility, which is extra useful during work that involves a lot of over-head arm movement.

- Repreve® polyester insulation in upper body
- Full-movement sleeves
- Hand-warming pockets with zippers
- Cuffs with thumb grip
- Elastic at bottom

**MATERIAL:** Main: 100% Polyamide 67 g/m<sup>2</sup>, Contrast: 64% Solution Dyed Polyester, 30% Viscose, 6% Elastane 380 g/m<sup>2</sup>, **Padding:** 90% REPREVE® Polyester (PES), 5% Polyester (PES), 5% Recycled Polyester (PES) 120 g/m<sup>2</sup>

**SUSTAINABILITY:** Recycled Polyester / REPREVE® Polyester / Solution Dyed Polyester

### 4902 FlexiWork Hybrid Vest

Versatile vest that works both as an outer layer and as an insulating layer underneath a shell jacket, making it a clear choice for general construction work in various temperatures.

9545

0404

Fit: Slim

Size: XS-3XL

REPREVE

The unique combination of materials makes this vest suitable for work in a wide temperature span. Shoulders and upper body feature REPREVE® insulation for warmth and wind protection, while the lower part is made of a flexible and ventilating jersey fabric for freedom of movement. This hybrid construction creates flexibility and at the same time provides extra warmth in critical areas.

- REPREVE® polyester for insulation
- Zippered hand-warming pockets made of solution-dyed, recycled polyester fleece
- Two inner stow pockets with pen compartments on left side
- Adjustable elastic at bottom hem

**MATERIAL:** Main: 100% Polyamide 67 g/m<sup>2</sup>, Contrast: 64% Solution Dyed Polyester, 30% Viscose, 6% Elastane 380 g/m<sup>2</sup>, **Padding:** 90% REPREVE® Polyester (PES), 5% Polyester (PES), 5% Recycled Polyester (PES) 120 g/m<sup>2</sup>

**SUSTAINABILITY:** Recycled Polyester / REPREVE® Polyester / Solution Dyed Polyester

### 1940 FlexiWork Softshell Stretch Jacket

Softshell stretch jacket for everyday work, made of high-quality fabrics that offer mobility, durability, and long-lasting comfort.

5695

0467

**Fit:**  
Slim

**Size:**  
XS-2XL

Flexible work jacket made of high-quality 4-way stretch softshell fabric for mobility, durability, and all-day working comfort. Designed for professionals who demand the best, the jacket features a body-mapped construction with full-stretch DuPont™ Kevlar® fiber fabric and a contrasting high-elastane double-weave polyamide fabric. Clean design meets advanced functionality, including front pockets with built-in ventilation and extended sleeve and back panels for extra protection.

- 4-way stretch softshell fabric for flexibility
- Full-stretch DuPont™ Kevlar® fiber fabric
- High-elastane, double-weave polyamide contrast fabric
- Dropped back and sleeve ends for added weather protection
- Suitable for profiling

**MATERIAL:** Main: 73% Polyamide (PA), 20% Polyurethane (PU), 7% Elastane 315 g/m<sup>2</sup>, **Contrast:** 84% Polyamide, 16% Elastane 284 g/m<sup>2</sup>, **Reinforcement:** 70% Polyamide (PA), 18% Kevlar® Aramide, 12% Elastane 400 g/m<sup>2</sup>

Fits with 6940 FlexiWork  
Softshell Stretch Trousers+ Holster Pockets

### 1300 FlexiWork Stretch Waterproof Shell Jacket

Never mind the pouring rain. Just keep on working with great freedom of movement and comfort in this elastic, 3-layer waterproof shell jacket that features taped seams. Conforms to EN 343.

0404

CE

**Fit:**  
Slim

**Size:**  
XS-3XL

Lightweight and elastic shell jacket suitable for everyday use in regular work environments. The jacket is made of durable ripstop material with mechanical stretch that ensures great working comfort, breathability and freedom of movement. Dropped sleeve ends offer extra protection without hampering your performance while dropped back ensures protection in all working positions. In addition, a waterproof hood provides extra protection against the elements.

- Ripstop fabric with mechanical stretch
- 3-layer CORDURA® reinforcements at the elbows
- Hood for extra protection and functionality
- Taped seams
- Lightweight design

**MATERIAL:** Main: 100% Polyamide 144 g/m<sup>2</sup>,  
**Reinforcement:** 100% CORDURA® Polyamide 305 g/m<sup>2</sup>

### 1948 LiteWork Hybrid Wind Jacket

Lightweight, wind-protective work jacket with high breathability built for most types of work in windy conditions. Can be used both as a mid-layer and outer layer.

0404

Fit: Regular

Size: XS-3XL

Hybrid work jacket that combines windproof front, back and upper sleeves with ventilating stretch fabric at sides and ventilation opening at back for a perfect balance between wind-protection and breathability. The result is a functional work jacket that allows you to work hard in windy conditions without overheating. In addition, the jacket features high collar, two reinforced front pockets and elastic drawcord at bottom hem for optimal fit. A great choice for craftsmen working in the general construction, transportation, logistics and facility management sectors.

- Windproof fabric at front, back and shoulder.
- Ventilating stretch fabric at sides and sleeves.
- Ventilation opening at back.
- High collar.
- Elastic drawcord at bottom hem.
- Two reinforced front pockets with zipper.

**MATERIAL:** Main: 100% polyamide, 69 g/m<sup>2</sup>. **Reinforcement:** 88% polyamide CORDURA®, 12% elastane, 275 g/m<sup>2</sup>. **Stretch:** 84% nylon, 16% elastane, 193 g/m<sup>2</sup>. **Lining:** 90% polyester, 10% elastane, 98 g/m<sup>2</sup>.

### 1908 LiteWork Windbreaker

Light yet durable windbreaker with hood that offers wind protection and breathability for optimal body temperature management the entire workday. Combine with a mid-layer for cooler conditions.

0404

Fit: Regular

Size: XS-3XL

Designed for everyday use, this light yet durable windbreaker both protects against the wind and keeps you cool during intense work in windy conditions. The thin and lightweight fabric offers great ventilation and makes the windbreaker smooth to wear at work. In addition, reflective details provide enhanced visibility in low-light conditions. Packable for easy storage.

- Wind-protective, lightweight material
- Hood for extra wind protection
- Hand pockets for practical storage
- Reflective details for visibility

**MATERIAL:** Main: 100% polyamide, 70 g/m<sup>2</sup>. **Lining:** 90% polyester, 10% elastane, 95 g/m<sup>2</sup>.

**8200 Rain Jacket, PU**

Beat the rain. For a 100% dry working day, wear this completely waterproof, PU-coated rain jacket with welded seams. Made of smooth and stretchy fabric for superior comfort. Conforms to EN 343.

9500

0400

Fit: Loose

Size: XS-3XL

- Superior waterproof technology — conforms to EN 343 and designed with totally waterproof seams, preventing moisture penetration for 100% protection
- Soft, heat-sealed 3M reflective tapes for enhanced visibility
- Adjustable hood for reliable protection and a perfect fit
- Reversed water-resistant YKK zipper for extra protection
- Two large front pockets and hook and loop adjustments at cuffs

MATERIAL: Main: 100% Polyester 190 g/m<sup>2</sup>

Fits with 8201 Rain Trousers, PU

**8378 Waterproof Set**

Always at hand. Lightweight rain jacket and trousers in easy pull-on design. Waterproof, windproof and breathable for dry working comfort. Conforms to EN 343.

0400

9500

Fit: Regular

Size: XS-3XL

- Taped seams for waterproof protection — conforms to EN 343
- Adjustable hood for reliable protection and a perfect fit
- Mesh lining, adjustable waists, hook and loop cuffs and adjustments at the ankles for enhanced comfort
- Complete set with jacket and trousers in a handy bag

MATERIAL: 100% polyamide, 130 g/m<sup>2</sup>.

## Ready for any weather.

From wind and rain to freezing cold, Snickers Workwear offers technical garments that protect against the elements. Windproof, waterproof, insulated and breathable — built to keep you comfortable and focused in any condition.

# When the cold sets in, turn up the heat.

Discover Q Heat, our collection of pro level heated workwear. Each garment in the collection features strategically placed heating panels for superior heat distribution. In addition, each garment has a detachable battery that fits into a riveted holder, making it easy to detach for washing and recharging.

## 5401 Q Heat Mini Vest

Discover this comfortable mini vest, featuring advanced digital heat panels that provide a balanced heating ratio around the torso. Wear it under your midlayer to stay warm even in the coldest working conditions.

0400

Size:  
One Size

This warming vest, designed to prevent frostbite and minimize the need for bulky layering, has advanced digital heat panels strategically placed to maximize heat distribution around the torso. Batteries are located in the chest pocket on both sides for easy access. Heat settings can be controlled through an app or directly on the battery. For best results, wear the vest close to your body and under a jacket to create a thermos effect, which traps heat effectively and ensures maximum warmth when working in harsh conditions.

- Easy-to-use electronic heating
- Designed to fit multiple sizes
- Two outer zipped chest pockets
- Front YKK zipper
- Suitable for profiling
- The battery is sold separately with the product number 5499-0000

**MATERIAL:** Main: 88% Polyester, 12% Elastane 238 g/m<sup>2</sup>,  
Lining: 100% Solution Dyed Recycled Polyester 215 g/m<sup>2</sup>

**SUSTAINABILITY:** Solution Dyed Recycled Polyester

## 5400 Q Heat Vest

Discover a comfortable vest with advanced digital heat panels, strategically placed at your lower and upper back. An optimal spread of heat across your torso ensures you stay warm even in the coldest conditions.

0400

Size:  
XS-2XL

This windproof vest, designed to prevent frostbite and minimize the need for bulky layering, features advanced digital heat panels strategically placed to maximize heat distribution around the torso. Batteries are located in the hand pockets on both sides for easy access. Heat settings can be controlled through an app or directly on the battery. For best results, wear the vest close to your body and under a jacket to create a thermos effect, trapping heat effectively and ensuring maximum warmth in harsh working conditions.

- Digital heat panels placed at upper and lower back
- Windproof, water-repellent, and stretchy softshell fabric
- Two outer zipped hand pockets
- Front YKK 2-way zipper with reflective details
- Zipper at lower inside to optimize for logo embroidery placement
- The battery is sold separately with the product number 5499-0000

**MATERIAL:** Main: 84% Polyester, 12% Polyurethane (PU), 4% Elastane 259 g/m<sup>2</sup>, Lining: 100% Solution Dyed Polyamide 65 g/m<sup>2</sup>

**SUSTAINABILITY:** Solution Dyed Polyamide (PA)

The garment charges in just 2 hours and provides 2-10 hours of battery life, depending on the heat setting.

## 5901 Q Heat Liner Gloves

Super-thin liner gloves designed to be worn inside regular gloves. Made with advanced digital heat panels strategically placed for optimal heating around your hand, these liner gloves offer unmatched warmth and comfort.

Size: 6-11

0404

These liner gloves, designed to prevent frostbite and minimize the need for bulky gloves, have digital heat panels for optimized heat distribution around the hand. Batteries are attached under the folded cuff. Heat settings can be controlled through an app or directly on the battery. For best results, wear the liner gloves inside another work glove to create a thermos effect, which traps heat effectively and ensures maximum warmth when working in harsh conditions.

- Digital comfort-heat at the back of the hand
- Thin, soft, and tightly fitted liner gloves
- Reinforced palm for durability
- Screen-sensitive fingertip
- 4-way stretch fabric
- The battery is sold separately with the product number 5499-0000

**MATERIAL:** Main: 92% Polyester, 8% Elastane 170 g/m<sup>2</sup>

Q Heat features the market's thinnest heat panels with no cable joints to bend or break. The garment is washable, and the battery unit is water and dust-proof.

### 5900 Q Heat High Socks

Discover heat socks designed for the extra cold climate. Featuring advanced digital heat panels, these sock wrap around the lower leg to provide optimal heating for your calf and foot.

Size: One Size

0498

These warming socks, designed to prevent frostbite, integrate digital heat panels that wrap around the lower leg for optimal heat distribution. Batteries are attached under the folded cuff beneath the knee area. Heat settings can be controlled through an app or directly on the battery. The elastic cuff ensures a comfortable fit. The socks, when worn with boots or shoes, create a thermos effect which traps heat effectively and ensures maximum warmth when working in harsh conditions.

- Easy-to-use electronic heating
- Thin, soft, and tightly fitted design
- Nylon reinforcements for durability
- Merino wool interior for extra warmth
- Extra durable yarn construction
- The battery is sold separately with the product number 5499-0000

**MATERIAL:** Main: 53% Polyamide, 22% Acrylic, 22% Merino Wool, 3% Elastane

### 5499 Q Inuheat One Powerpack

Inuheat One is the hub of the Heat Ready ecosystem. The smart electronics allow you to have and control the active heat in all different Heat Ready products.

Size: One Size

The concept of a battery for several different applications is recognizable from, for example, modern hand tools available today. InuheatOne is designed and manufactured in Sweden to be the most advanced electronics for heat in clothing on the market today and it is made to work under extremely tough conditions. The current is transmitted via magnets instead of cord connections, which minimizes the risk of things breaking. The heat in the Heat Ready garments can either be controlled via the button on the power pack or via the user connecting InuheatOne to the associated smartphone application. In addition to the ability to control the heat, the user then also gets access to heat boost, information about the product it is heating, access to premium support and much more. Faster charging than other heating systems on the market. The package includes two Inuheat One power packs, a charging adapter, a USB cable and an instruction manual.

- Powerpack for Heat Ready thermal socks and thermal gloves  
Works with all Heat Ready products
- Designed and manufactured in Sweden  
Faster charging than other systems on the market
- Pair it with Inuheat's smartphone app for more features
- Battery cell that maintains capacity even in cold conditions
- Easy to use

# Midlayers made for movement.

Discover our range of lightweight and comfortable midlayers. Crafted with full flexibility for optimal comfort, they are perfect for layering and year-round use. Choose from a range of styles featuring windproof softshell fabrics, soft and innovative fleece and technical details.

## 8006 Pile Vest

**Fit:**  
Regular

**Size:**  
XS-3XL

This hooded heavy-weight sweatshirt jacket is made from a bonded fabric with a soft fleece interior, providing warmth and comfort in any environment. Designed with CORDURA® reinforcements at the shoulders, elbows, and kangaroo pocket. The jacket has a hidden zipped pocket behind the kangaroo pocket, perfect for storing your essentials. It also has a comfortable hood, lined with cotton jersey, with wide drawstrings. The loose, classic fit provides comfort and freedom of movement. The jacket is designed with a reflective transfer print on the sleeve for visibility and a Snickers Workwear embroidery on the back. Suitable for profiling.

- CORDURA® reinforcements for durability
- Bonded fabric with fleece interior
- Hidden zipped pocket for secure storage
- Reflective transfer print on the sleeve for visibility
- Ribbed cuffs and hem for a comfortable fit
- Hood with cotton jersey lining and wide drawstrings

**MATERIAL:** Main: 56% Recycled Polyester, 41% Cotton, 3% Elastane 495 g/m<sup>2</sup>, **Front pockets:** 100% CORDURA® Polyamide 140 g/m<sup>2</sup>

**SUSTAINABILITY:** Recycled Polyester

## 8410 Windblocker Fleece Jacket

Wind-blocking, three-layer fleece jacket with a stretchy fit and CORDURA® reinforcements. Designed for comfort in unpredictable conditions, it combines flexibility with lasting durability.

9596

**New!**

0404

## 2551 Wool T-Shirt

**Soft and versatile merino wool t-shirt that offers natural temperature regulation and antibacterial properties. Perfect as a first layer or on its own for warmer days.**

3100

0400

2800

Fit: Slim

Size: XS-3XL

This lightweight t-shirt is crafted from 100% mulesing-free merino wool, a natural fiber that is odor-resistant, temperature-regulating, and antibacterial. With a regular fit and flatlocked seams, this t-shirt provides comfort and freedom of movement while flatlocked seams minimize chafing. Ideal for layering, it can be worn as a first layer or on its own during milder weather. The t-shirt also features a printed neck label for comfort, a Snickers Workwear silicone print at the bottom, and a badge on the sleeve made from apple leather—a sustainable material crafted from apple waste.

- Wool with natural temperature regulation properties
- Wool with natural antibacterial and odor-resistant properties
- Moisture-wicking capabilities
- Flatlock seams to minimize chafing
- Snickers Workwear apple leather badge
- Snickers Workwear silicone print

MATERIAL: 100% Merino Wool, 160 g/m<sup>2</sup>

## 8451 Midlayer Wool Jacket

**High-performing wool jacket with a double-knit construction, combining the warmth of merino wool with Coolmax® moisture-wicking technology. Comfortable in cold conditions, it's ideal for layering.**

0400

2800

Fit: Slim

Size: XS-4XL

This soft and functional midlayer jacket is crafted with a double-knit construction, combining the natural warmth of 100% mulesing-free merino wool with Coolmax® technology for advanced moisture-wicking and quick-drying capabilities. The outer layer of merino wool provides exceptional warmth, while the Coolmax® fiber interior pulls moisture away from the skin, keeping you cool, dry, and comfortable without any itching. Additional features include an adjustable bottom hem and cuffs with thumb grips. Zipped hand pockets offer convenient storage, and a 2-way front zipper adds flexibility. Details include a Snickers Workwear silicone print at the bottom and a badge on the sleeve made from apple leather—a sustainable material crafted from apple waste.

- Functional double-knit construction with natural temperature regulation
- Wool with natural antibacterial and odor-resistant properties
- Coolmax® moisture-wicking technology
- Zipped hand pockets
- Adjustable bottom hem and cuffs with thumb grips
- 2-way front zipper

MATERIAL: Main: 50% Merino Wool, 50% Coolmax® Polyester 320 g/m<sup>2</sup>

**New!**

## The power of wool.

Supercharged with natural properties, wool regulates temperature, wicks moisture, and resists odour to keep you comfortable all day.

9483 Woolmix Seamless  
Baselayer Long Sleeve Top

Lightweight base layer top made from a wool blend with excellent moisture-wicking properties and warmth, perfect for cold-weather workdays.

0400

Fit: Body Fit

Size: XS-2XL

Crafted from a blend of soft wool and polyamide, this seamless base layer top offers insulation, moisture transport, and comfort in cold conditions. Wool naturally resists odour and efficiently traps warm air close to the body. In contrast, polyamide effectively wicks away moisture and is gentle against the skin. Featuring a body-mapped design, it provides slight support and ventilation where it's most needed. Accented with decorative orange flatlock seams and a Snickers Workwear logo on the chest.

- Seamless slim-fit design
- Natural anti-odour properties
- Body-mapped design for support and ventilation
- Quick drying
- Fits both men and women with its seamless, adaptive design

MATERIAL: Main: 58% Polyamide, 40% Wool, 2% Elastane

## 9246 Cordura Wool Sock

Heavy-duty wool socks that combine great fit with CORDURA®-reinforced functionality. Put them on and experience superior warmth and durable working comfort in demanding environments.

9804

Size: 37-48

These technically advanced work socks are made of a high-quality mulesing-free merino wool blend that keeps your feet warm and fresh during the entire workday. Terry-knit interior provides enhanced insulation and plush comfort while CORDURA® reinforcement at toes and heels adds durability. In addition, air channels and mesh structure in hot spots offer targeted ventilation for optimal comfort. Furthermore, elastic rib at arch and ergonomic left and right design ensures a perfect fit.

- Merino wool blend with terry-knit inside
- CORDURA®-reinforced toe and heel
- Mesh structure ventilation
- Elastic rib arch
- Ergonomic left and right fit

**MATERIAL:** Main: 33% Polyamide, 19% Merino Wool, 19% Acrylic, 19% Polypropylene, 8% CORDURA® Polyamide, 2% Elastane

## 9216 Wool Socks, 2-Pack

Thin and comfortable merino wool socks that keep your feet warm and fresh in all kinds of working conditions. 2-pack.

0400

Size: 37-40, 41-44, 45-48

Socks that combine great fit and comfort with excellent functionality. The socks are made of mulesing-free merino wool and feature a mesh panel for enhanced ventilation, elastic construction for optimal fit, and reinforced toe and heel for extra durability.

- Knitted and elastic rib at arch and shaft
- Mesh panel for enhanced ventilation
- Reinforced toe and heel
- Rib-knit cuffs
- Machine washable in 40 °C

**MATERIAL:** 34% merino wool, 34% acrylic, 31% polyamide, 1% elastane.

## 9225 Wool Terry Socks, 2-Pack

Premium merino wool socks with body-mapped design for optimal functionality and comfort during everyday work. 2-pack.

0400

Size: 37-48

Wool socks that combine great fit and comfort with excellent functionality. Terry-knit, mulesing-free merino wool panels at the bottom provide extra warmth, comfort and durability. The socks also feature rib construction for optimal fit and reinforced toe and heel for a durable, long-lasting design.

- 60% merino wool
- Terry-knit panels at bottom
- Reinforced toe and heel
- Rib-knit shaft
- Machine washable in 40 °C

**MATERIAL:** Main: 60% Merino Wool, 38% Polyamide, 2% Elastane

### 9227 Heavy Wool Socks

Thick wool socks that provide exceptional insulation and comfort during tough workdays in cold conditions.

0458

Size: 37-48

The socks are made of terry-knit, mulesing-free merino wool that offers excellent moisture transport, ventilation, and warmth. Body-mapped design with reinforced shin and ankle ensures optimal functionality and comfort on cold winter days. In addition, the socks feature elastic rib knitting at arch for a perfect fit.

- 51% merino wool
- Warm terry knit
- Reinforced areas
- Elastic knitting at arch
- Machine washable in 40° C

**MATERIAL:** Main: 51% Merino Wool, 47% Polyamide, 2% Elastane

### 9212 High Heavy Wool Socks

Heavy and durable wool socks with high shaft that provide great warmth and comfort during work in cold conditions.

1804

Size: 37-48

High wool socks made from a felt-knit material with a soft interior. The inner terry layer is made from mulesing-free merino yarn, providing exceptional insulation. In addition, the heel and toe areas have been reinforced for enhanced durability, ensuring these socks stand the test of time. Elastic knit at the arch provides a tight and secure fit.

- Felt-knit wool
- High shaft
- Elastic rib arch
- Reinforced toe and heel
- Machine washable 40 °C

**MATERIAL:** Main: 84% Merino Wool, 12% Elastane, 4% Polyamide

### 9228 Wool Compression Knee High Sock

Technically advanced merino wool socks with graduated compression level 1 that provide increased blood circulation, insulation and moisture transport for optimal performance.

0400

Size: 37-39, 40-42, 43-45, 46-48

Lightweight merino wool socks with high shaft and graduated compression engineered to help hard-working craftsmen perform with optimal comfort during longer periods of time. The socks are made of a mulesing-free merino wool blend and feature a body-mapped design, which includes mesh and various knitting techniques for enhanced comfort and function. In addition, the socks are reinforced in the toe and heel areas for extra durability. Developed in collaboration with medical expertise.

- Graduated compression level 1
- Mulesing-free merino wool
- Mesh structure ventilation at top of foot
- Reinforced toe and heel
- Ergonomic left and right fit

**MATERIAL:** 53% merino wool, 39% polyamide, 8% elastane.

## 9229 37.5® Compression Knee High Socks

Technically advanced socks with graduated compression level 1 that provide cooling, moisture transport and increased blood circulation for optimal performance.

0428

Size: 37-39, 40-42, 43-45, 46-48

Lightweight compression socks with high shaft and graduated compression engineered to help hard-working craftsmen perform with optimal comfort during longer periods of time. The socks are made of highly functional yarn and feature a body-mapped design, which includes mesh and various knitting techniques for enhanced comfort and function. In addition, the socks feature reinforcements in toe and heel for extra durability. Developed in collaboration with medical expertise. Ergonomic left and right fit.

- Graduated compression level 1
- 37.5° technology
- Mesh panels on top of foot
- Reinforced toe and heel
- Ergonomic left and right fit

**MATERIAL:** 33% polyamide, 19% cotton, 19% polyester, 18% 37.5° polyester, 11% elastane.

## 9240 37.5® Low Socks

Lightweight and durable socks with low shaft that offer superior cooling comfort during intense work and in warmer conditions.

2804

Size: 37-48

Advanced work socks made of a quick-drying fabric featuring 37.5° technology to keep your feet cool, dry, and ventilated. Air channels and mesh structure in hot spots provide extra ventilation where you need it the most, while a reinforced toe and heel offer extra durability. In addition, the socks have a low shaft as well as an ergonomic left and right fit.

- 37.5° technology
- Air channels and mesh structure in hot spots
- Reinforced toe and heel
- Ergonomic left and right fit
- Low shaft

**MATERIAL:** Main: 40% Polyamide, 39% 37.5° Polyester, 19% Polypropylene, 2% Elastane

## 9220 37.5® Socks

Lightweight, durable socks that offer superior cooling comfort during intense work and in warmer conditions.

2804

Size: 37-48

Size: One Size

- Soft and stretchable fabric for optimum fit and comfort
- Clean design for convenient company profiling
- Contemporary design for a smart look

MATERIAL: Main: 95% Cotton, 5% Elastane 230 g/m<sup>2</sup>

### 9032 Cotton Small Logo Beanie

A soft and comfortable cotton beanie featuring a small Snickers Workwear logo.

**New!**

Size: One Size

Stay warm and comfortable with this lightweight beanie crafted from soft, stretchy cotton. The clean design is accentuated by a small Snickers Workwear logo.

- Soft, stretchy cotton fabric for optimal fit and comfort
- Clean design with a small Snickers Workwear logo

MATERIAL: Main: 95% Cotton, 5% Elastane 230 g/m<sup>2</sup>

**9017 Printed Cotton Beanie**

Soft and comfortable cotton with Snickers Workwear print.

0400

Size: One Size

- Soft and stretchable fabric for optimum fit and comfort
- Contemporary design for a smart look with big Snickers Workwear logo

MATERIAL: Main: 95% Cotton, 5% Elastane 230 g/m<sup>2</sup>**9053 Seamless Helmet Liner**

Keep your head warm under your hard hat with this soft and comfortable helmet liner. Made in a seamless design for best possible comfort.

0418

Size: S/M-L/XL

- Light and thin design for a perfect fit under your hard hat
- Soft and stretchable fabric for optimum fit and comfort

MATERIAL: Main: 72% Polyamide, 26% Polypropylene, 2% Elastane

**9052 Seamless Balaclava**

The right protection when the cold gets tough. This seamless balaclava has been developed to offer warmth and weather protection when used under a hard hat. Soft, great comfort while light and thin for a great fit.

0418

Size: S/M-L/XL

- Perfectly shaped to cover the neck, reaching down to overlap the chest, back and shoulders.
- Mesh knit ventilation on chosen areas, over the ears to facilitate hearing, and on the front for easy breathing when you pull up the balaclava for protection of chin, mouth and nose.

MATERIAL: Main: 72% Polyamide, 26% Polypropylene, 2% Elastane

**9054 Seamless Multifunctional Headwear**

The ideal garment to have with you when the cold sets in. Thanks to the smooth, stretchy fabric this multifunctional headwear can be worn in any way you like – as a balaclava, headband, beanie or neck warmer.

0400

Size: One Size

- Smooth, stretchy quick-drying fabric for comfortable warmth and protection
- Can be worn under a hard hat for great warmth and comfort
- Keeps long hair in place for enhanced safety

MATERIAL: Main: 92% Polyamide, 8% Elastane

## 9000 Tech Cap

**Technical 6-panel cap made from a lightweight and durable woven fabric with 4-way stretch. Designed with mesh side panels for added ventilation and breathability.**

0400

**Size:** One Size

Crafted from functional fabrics, this cap offers lightweight durability and a great fit. To ensure all-day comfort, it's designed with mesh panels for ventilation and an interior sweatband that helps absorb sweat. For visibility, the cap features reflective details around the brim and a reflective Snickers Workwear S-logo at the front. The back adjuster with Velcro allows you to easily adjust the fit of the cap. For sun protection, the fabric has been tested for UPF40+.

- Mesh panels for ventilation and breathability
- Velcro back adjuster for a customized fit
- Interior sweatband
- Snickers Workwear silicone badge
- Fabric has been tested tested for UPF40+.

**MATERIAL:** Main: 92% polyester, 8% elastane, 130 g/m<sup>2</sup>. Contrast: 100% polyester, 130 g/m<sup>2</sup>.

## 9001 Trucker Cap

**Crafted from cotton twill with a mesh back for enhanced ventilation, this cap is designed with a deep shape to provide that authentic trucker cap look and fit.**

4104

0404

3104

9504

**Size:** One Size

This classic trucker cap is made from durable cotton twill and features a mesh back to ensure breathability. The deep shape provides a true trucker fit and offers optimal comfort. It is designed with raised, tone-in-tone Snickers Workwear embroidery and has a snapback closure for easy size adjustment.

- Mesh back for ventilation
- Snapback closure for easy size adjustment
- Snickers Workwear embroidery
- Snickers Workwear silicone badge

**MATERIAL:** Main: 100% cotton, 265 g/m<sup>2</sup>. Contrast: 100% polyester, 210 g/m<sup>2</sup>.

### 9002 Flexible Cap

Made from cotton twill with 2-way stretch, this 6-panel flexfit cap offers a truly comfortable fit and is designed with ventilation holes for breathability.

Size: One Size

This Flexfit Logo Cap is crafted from high-quality woven cotton twill with 2-way stretch, ensuring both comfort and durability. The stretchy fabric allows the cap to adjust to the shape of your head, and the internal, elastic Flexfit headband provides a perfect fit without the need for manual adjustment. Designed with embroidered ventilation holes for breathability, the cap also features a distinctive Snickers Workwear embroidery at the front.

- Cotton twill with 2-way stretch for comfort
- Interior Flexfit headband for a perfect fit without manual adjustment
- Embroidered ventilation holes
- Raised original Snickers Workwear embroidery

MATERIAL: Main: 97% cotton, 3% elastane, 260 g/m<sup>2</sup>.

### 9041 Logo Cap

Classic 6-panel cap with ventilation holes for extra breathability and comfort. Pre-curved visor ensures great sun protection and the right expression. Comes with somewhat higher fit to suit most head shapes.

Size: One Size

- Pre-curved visor
- Easy adjustment at the back for optimal fit
- Rubber-printed Snickers Workwear logo at front

MATERIAL: Main: 100% Cotton 260 g/m<sup>2</sup>

### 9095 Small Logo Cap

This classic 6-panel cap, featuring a small Snickers Workwear logo, is designed for comfort and breathability. A pre-curved visor offers sun protection and a timeless look.

**New!**

Size: One Size

Designed with a small Snickers Workwear logo, this classic 6-panel cap combines style and functionality. Ventilation holes ensure breathability, while the pre-curved visor provides sun protection and a timeless appearance. The cap has a slightly higher fit that suits most head shapes, making it both versatile and comfortable.

- Pre-curved visor
- Easy adjustment at the back for optimal fit
- Small rubber-printed Snickers Workwear logo at front

MATERIAL: 100% Cotton, 260 g/m<sup>2</sup>.

## 9079 Cap

Classic cap with higher fit to suit most head shapes. Pre-curved visor ensures great sun protection and ventilation holes gives extra breathability and comfort. For optimal fit the cap can be adjusted at the back. A great choice for profiling.

Size: One Size

- Pre-curved visor
- Easy adjustment in the back for optimal fit
- Plenty of space for profiling

MATERIAL: Main: 100% Cotton 260 g/m<sup>2</sup>

## 9091 Sunprotection Cap

Sun-protective cap that provides excellent protection against strong sunlight. Ventilation eyelets on strategic places offer efficient cooling while drawcord around the head ensures optimal fit.

Size: S/M-L/XL

Protect your head from the sun with this versatile cap, made from a fabric that has been tested for UPF 50+ sun protection. This cap is the perfect choice when you want excellent protection against strong sunlight during your workday. It's designed with a protective brim at the front and flaps that cover the ears, sides, and back of the neck. Ventilation eyelets are optimally placed to provide efficient cooling, while the drawcord ensures an optimal fit.

- Main fabric is UV-tested up to UPF 50+ according to EN 13758
- Sun-protective flaps protect the ears, sides and neck
- Ventilation eyelets to remove body heat
- Drawcord around the head to ensure great fit

MATERIAL: Main: 100% Cotton 230 g/m<sup>2</sup>

## 9072 Bucket Hat

Sun-protective bucket hat that keeps your head cool on warm and sunny workdays.

Size: S/M-L/XL

Protect your head from the sun with this sun-blocking bucket hat, made from a 100% cotton fabric that has been tested for UPF50 sun protection. Designed with four ventilation holes and a decorative rubber badge on the right side.

- Made from a fabric tested for UPF 50 tested sun protection.
- 360-degree brim.
- Rubber badge at center front.
- Four ventilation holes.

MATERIAL: Main: 100% Cotton 230 g/m<sup>2</sup>

### 9004 Logo Belt

Durable belt featuring a rubber-coated metal buckle with a matte finish for a softer touch and a stylish, contemporary expression. Snickers Workwear printed on belt.

Size: One Size

- 40 mm wide
- Firm and rough webbing for extra durability
- Rubber-coated metal buckle, removable for length/size adjustment

MATERIAL: Main: 100% Polyester

### 9071 Belt

Durable belt featuring a rubber-coated metal buckle with a matte finish for a softer touch and a stylish, contemporary expression.

Size: One Size

- 40 mm wide
- Firm and rough webbing for extra durability
- Rubber-coated metal buckle, removable for length/size adjustment

MATERIAL: Main: 100% Polyester

### 9020 Elastic Belt

Elastic belt that features a slim plastic buckle for a smooth, lightweight fit. Designed for ease of movement and on-the-job comfort, the belt's textile and plastic design also makes for a smoother process at airport security checkpoints.

Size: One Size

- 40 mm wide elastic belt that shapes itself to your body
- Slim, lightweight and non-scratchable plastic buckle
- Quick-and-easy lock system

MATERIAL: Main: 95% Polyester, 5% Elastane

## 9018 Belt

This light-weight belt is the ideal complement to your LiteWork trousers, pirates or shorts. Thin, elastic and with easy-adjustable buckle for optimum comfort and fit.

Size: One Size

- 40 mm wide, elastic belt that shapes itself to your body
- Thin and lightweight fabric for enhanced comfort when working in the heat
- Hard-wearing non-scratch plastic buckle with quick and easy lock system

MATERIAL: Main: 95% Polyester, 5% Elastane

## 9025 Ergonomic Belt

Experience this high top quality elastic belt with a distinctive antique silver finish buckle. Designed for on-the-job comfort with a contemporary flair.

Size: One Size

- 40 mm wide, elastic belt that shapes itself to your body
- Quick and easy lock system
- Top quality antique silver finish on buckle with Snickers Workwear logo
- Discreet, yet contemporary "Snickers Workwear" embossed on belt

MATERIAL: Main: 95% Polyester, 5% Elastane

## 9033 Logo Belt

A must for the Snickers Workwear craftsman. Hardwearing fixed belt with non-scratch buckle. Available in several colours to match your image at work.

Size: 90-130

- Non-scratch plastic buckle with Snickers Workwear symbol
- Quick and easy lock system
- 40 mm wide belt with pronounced Snickers Workwear logos
- Firm and rough webbing for extra durability
- Available in three colours, including Hi-Vis nuance

MATERIAL: Main: 100% Polyester

## 9034 Leather Belt

Buckle-up in this hard-wearing classic leather belt in top-quality finish, featuring a sturdy buckle for a long service life. Available in three sizes for an optimal fit.

Size: 90-130

- Non-chrome, eco friendly treated high-quality leather
- 4 mm thick and 45 mm wide for extra strength and durability
- Sturdy buckle with steel pin for enhanced durability
- Ideal if you are working in a heat and flame environment
- Available in 3 sizes for an optimal fit

MATERIAL: Main: 100% Leather

## 9050 Elastic Braces

0418

Elastic all the way, these reliable braces feature wide bands to evenly distribute your load and ensure all-day working comfort.

**Size:** One Size

- Extra wide elastic straps for comfort, support and optimal fit
- Wide and firm clips for secure fastening
- Easy length adjustment

**MATERIAL:** Main: 90% Polyester, 10% Elastane

## 9064 Logo Braces

0604

0458

Logo braces built with an ergonomic design suitable for everyday use. The braces feature secure clips that provide all-day secure fastening of trousers as well as wide elastic straps for even distribution.

**Size:** One Size

Elastic braces designed to provide working comfort and secure fastening of trousers during everyday use. The ergonomic logo braces offer reliable durability and feature tightly placed clips that keep the trousers in position even during intense work. In addition, extra wide elastic straps ensure an even distribution, offering optimal support, comfort and flexibility.

- Extra wide elastic straps
- Secure clips for fastening
- Durable and ergonomic design

**MATERIAL:** Main: 70% Polyester, 30% Elastane

## 9623 Waterproof Backpack

0400

Waterproof backpack for dry and clean storage of spare clothes and gear when you're on the move. The lightweight and hardwearing backpack features roll top, welded seams, padded back and adjustable chest strap and shoulder straps. 20 litres.

# Carry smarter. Work better.

Snickers Workwear offers a choice of safe and ergonomic tool carrying systems that can be easily adapted to meet all needs. Choose between an ergonomic tool belt with leather pouches or durable textile pouches, or one of our tool vests with many smart features.

## Flexi Attachment System.

This flexible system for attaching pouches onto Snickers Workwear toolbelts lets you add the pouches of your choice in any position.

### 9790 XTR Toolbelt

The ultimate toolbelt. Count on advanced ergonomic design and superior padding for enhanced working comfort, a flexible pouch attachment system and Cordura® reinforcements for extra durability.

0404

Size: One Size

- Advanced ergonomic design with support at the right places and multi-layer padding for enhanced working comfort
- Hardwearing CORDURA® reinforcement on the inside for extra durability and reflective features on the outside for enhanced visibility
- Innovative pouch attachment system, giving you the freedom to add and position pouches as you like
- Robust and innovative aluminium buckle designed for easy one-hand opening and closing
- Available in three sizes for optimal fit

MATERIAL: Main: 100% Polyamide

### 9792 Braces

Relieve the weight on your hips. Hardwearing yet extremely comfortable braces for Snickers Workwear toolbelts.

0404

Size: One Size

- Ergonomic design with padded and reinforced shoulders for enhanced working comfort and durability
- Easy to adjust for a perfect fit
- Elastic in the back for added convenience when bending forward
- Aluminium hooks for easy attachment to the belt
- Can be attached at two positions on the belt for an optimal fit

MATERIAL: Main: 100% Polyamide

## 9770 XTR Carpenter's Toolbelt

Gear up with the ultimate carpenter's toolbelt. Count on advanced ergonomic design, padded braces and a flexible attachment system that includes hardwearing leather pouches and a special carpenter's tool pouch.

Size: One Size

- CORDURA® reinforced belt in advanced ergonomic design with an innovative and flexible pouch attachment system
- Adjustable and removable braces with shoulder padding reduce the weight on your hips for enhanced ergonomics and comfort
- Special carpenter's leather tool pouch with compartments and loops, including a hammer holder, knife attachment buttons and pen compartment
- Two durable leather nail & screw pouches with angled design and wide openings for easy access
- Robust and innovative aluminium buckle designed for easy opening and closing

**MATERIAL:** Belt: 100% Polyamide, Pouches: 100% Leather, Braces: 100% Polyamide

## 9780 XTR Electrician's Toolbelt

Power up with the ultimate electrician's toolbelt. Count on advanced ergonomic design, padded braces and a flexible attachment system that includes hardwearing leather pouches and a special electrician's tool pouch.

Size: One Size

- CORDURA® reinforced belt in advanced ergonomic design with an innovative and flexible pouch attachment system
- Adjustable and removable braces with shoulder padding reduce the weight on your hips for enhanced ergonomics and comfort
- Special electrician's leather tool pouch with compartments and loops for screwdrivers, pliers, utility knife, voltmeter and hammer
- Two durable leather nail & screw pouches with angled design and wide openings for easy access
- Robust and innovative aluminium buckle designed for easy opening and closing

**MATERIAL:** Belt: 100% Polyamide, Pouches: 100% Leather, Braces: 100% Polyamide

## 9772 Craftsmen Toolbelt

Designed with reinforced functionality and a flexible attachment system that includes durable pouches and a special craftsmen's tool pouch.

Size: One Size

- Reinforced belt in curved design with an innovative and flexible pouch attachment system
- Soft padding for enhanced working comfort
- Special craftsmen's tool pouch with compartments and loops, including a hammer holder, knife attachment buttons and pen compartment
- Two nail & screw pouches with angled design and wide openings for easy access
- Robust and innovative aluminium buckle designed for easy opening and closing

**MATERIAL:** Main: 100% Polyamide

## 9782 Service, Toolbelt

Designed with reinforced functionality and a flexible attachment system that includes durable pouches and a special service tool pouch.

Size: One Size

- Reinforced belt in curved design with an innovative and flexible pouch attachment system
- Soft padding for enhanced working comfort
- Special service tool pouch with compartments and loops for screwdrivers, pliers, utility knife, hammer and tape measure
- Two nail & screw pouches with angled design and wide openings for easy access
- Robust and innovative aluminium buckle designed for easy opening and closing

**MATERIAL:** Main: 100% Polyamide

### 9775 Carpenter's Tool Pouch

Designed for the carpenter. Extremely hardwearing leather tool pouch for your essential tools. Uniquely designed for Snickers Workwear toolbelts.

Size: One Size

- Hardwearing pouch made in thick leather, with double seams and rivets for extra durability
- Special reinforced compartments and durable Nylon loops for good overview and easy access to your tools
- Hammer holder in durable rubber plastic
- Pen compartment and knife attachment buttons suitable for the Hultafors craftsmen's knives
- Unique solution for easy and reliable attachment on the toolbelt

MATERIAL: Main: 100% Leather

### 9785 Electrician's Tool Pouch

Designed for the electrician. Extremely hardwearing leather tool pouch for your essential tools. Uniquely designed for Snickers Workwear toolbelts.

Size: One Size

- Hardwearing pouch made in thick leather, with double seams and rivets for extra durability
- Special reinforced compartments and durable Nylon loops for easy access to your screwdrivers, pliers, utility knife and voltmeter
- Hammer holder in durable rubber plastic, suitable for the Hultafors electrician's hammer
- Knife attachment button suitable for the Hultafors craftsmen's knives
- Unique solution for easy and reliable attachment on the toolbelt

MATERIAL: Main: 100% Leather

### 9795 Nail & Screw Pouches

Always at your fingertips. Extremely hardwearing leather nail & screw pouches, uniquely designed for Snickers Workwear toolbelts.

Size: One Size

- Kit with two hardwearing pouches made in thick leather, with double seams and rivets for extra durability
- Smart angled design and wide openings for easy access
- Two compartments and extra tool loop for added convenience
- Unique solution for easy and reliable attachment on the toolbelt

MATERIAL: Main: 100% Leather

### 9762 Hammer Holder Pouch

Durable hammer holder pouch, uniquely designed for Snickers Workwear toolbelts

Size: One Size

- Hammer holder in durable rubber plastic
- Compartment for your utility knife

MATERIAL: Main: 50% Polyamide, 50% Thermoplastic Elastomer (TPE)

### 9776 Craftsmen Tool Pouch

Durable tool pouch for your essential tools. Uniquely designed for Snickers Workwear toolbelts.

0404

Size: One Size

- Special reinforced compartments and durable Nylon loops for good overview and easy access to your tools
- Hammer holder in durable rubber plastic
- Pen compartment and knife attachment buttons suitable for the Hultafors craftsmen's knives
- Unique solution for easy and reliable attachment on the toolbelt

MATERIAL: Main: 100% Polyamide

### 9786 Tool Pouch

Durable tool pouch for your essential tools. Uniquely designed for Snickers Workwear toolbelts.

0404

Size: One Size

- Reinforced compartments and durable and loops for easy access to your screwdrivers, pliers, utility knife and tape measure
- Hammer holder in durable rubber plastic, suitable for the Hultafors electrician's hammer
- Unique solution for easy and reliable attachment on the toolbelt

MATERIAL: Main: 100% Polyamide

### 9796 Nail & Screw Pouches

Always at your fingertips. Durable nail & screw pouches, uniquely designed for Snickers Workwear toolbelts.

0404

Size: One Size

- Kit with two durable pouches made in Polyamide
- Smart angled design and wide openings for easy access
- Two compartments and extra tool loop for added convenience
- Unique solution for easy and reliable attachment on the toolbelt

MATERIAL: Main: 100% Polyamide

### 9794 Flexi Holster Pockets

A popular standard. Two attachable holster pockets that features a smart design. Fits tool fasteners on Snickers toolvest, trousers and Snickers Flexi Pocket system. Made in extremely durable Cordura® fabric for a long service life.

0400

Size: One Size

- Attachable holster pockets that can be attached either with hook and loop tool fasteners or to a normal belt
- Very strong CORDURA® fabric for a long service life
- One main compartment with smaller outside compartments
- Bar tacks at critical parts for maximum durability

MATERIAL: Main: 100% Polyamide

## Flexible tool pouches.

Available in durable polyamide or classic leather, these pouches offer flexible tool storage that fits your way of working. Attach them to your belt or to the trousers' integrated tool holders for quick access on the job.

### 9764 Long Tool Pouch

Durable long tool pouch, uniquely designed for Snickers Workwear toolbelts

0400

Size: One Size

- Three durable compartments for special tools and materials
- Knife attachment button suitable for the Hultafors craftsmen's knives

MATERIAL: Main: 100% Polyamide

### 9767 Leather Long Tool Pouch

Durable and sustainable long tool pouch designed for everyday use. The flexible tool carrier is built with vegetable tanned waste leather and offers easy access to various tools. Attach to the tool holder system or belt.

0400

Size: One Size

Long tool pouch that provides easy access to various long tools. Made from vegetable tanned waste leather, the sustainable tool pouch is durable to withstand the wear and tear from everyday use. In addition, the pouch features a hole at bottom to fit long and narrow tools such as screwdrivers. Attaches easily to belt or tool holder. Made in Sweden from European origin leather.

- Vegetable tanned leather
- European origin leather produced in Sweden
- Long design for versatile tool carrying
- Hole at bottom to fit screwdrivers etc.
- Easy access

MATERIAL: Main: 100% Leather

### 9768 Leather Measuring Tape Pouch

0400

Size: One Size

Leather measuring tape pouch that allows the measuring tape to be accessible at all times. The pouch securely attaches to the tool holders or belt for easy access. Designed for everyday use, the pouch is manufactured from vegetable tanned waste leather and produced in Sweden.

- Vegetable tanned leather
- European origin leather produced in Sweden
- Attaches to tool holders and belt

**MATERIAL:** Main: 100% Leather

### 9769 Utility Knife Pouch

0400

Size: One Size

Leather utility knife pouch that allows the utility knife to be accessible at all times. The pouch securely attaches to the tool holders or belt for easy access. Designed for everyday use, the pouch is manufactured from vegetable tanned waste leather and produced in Sweden.

- Vegetable tanned leather
- European origin leather produced in Sweden
- Attaches to tool holders and belt

**MATERIAL:** Main: 100% Leather

### 9798 Multi pouch

0400

Size: One Size

Multi-use pouch that offers a comfortable carrying function and easy access to your tools and other working accessories or material such as screws and nails. The versatile pouch attaches to tool holders or belt, ensuring convenience and ease of use. Made from durable polyamide, the hardwearing multi pouch withstands regular use and the wear from tools. In addition, the pouch can be closed for secure storage, using a cord lock.

- Durable polyamide
- Multi-use functionality
- Easy access to tools, accessories, screws, nails etc.
- Attaches to tool holders and belt

**MATERIAL:** Main: 100% Polyamide

### 9746 Protective Smartphone Pouch

0404

Size: One Size

Hardwearing and protective smartphone pouch with welded seams for durable dust and water protection in rough working conditions. The protective pouch fits most smartphones and has a flexible design that attaches to tool holders or belt. Comes with shock-absorbing padding for extra protection.

- Water-resistant design
- Protection in dusty environments
- Welded seams for enhanced water protection
- Versatile attachment options
- Padded for extra protection

**MATERIAL:** Main: 90% Polyamide, 10% Thermoplastic Polyurethane (TPU)

## 9716 Hammer Holder

Advanced, hard-wearing hammer holder with ergonomic design. Angled for easy access and comfortable positioning of the hammer against the leg.

0400

Size: One Size

- Ergonomically angled design prevents the hammer-handle from hitting your leg when walking and getting in the way when bending down on your knees
- Easy to attach to Snickers tool fasteners, trousers, belts, Toolvest and Flexi Pocket system
- Angled slightly away from your body for easy access to the hammer
- Accommodates most hammers in the market
- Made in a hard-wearing yet flexible material that will not scrape delicate surfaces

MATERIAL: Main: 100% Thermoplastic Elastomer (TPE)

## 9736 Hammer Holder - Display Box 10 pcs

Advanced, hard-wearing hammer holder with ergonomic design. Angled for easy access and comfortable positioning of the hammer against the leg.

## 9700 Flexi Hook and Loop Fastener

Bringing it all together. Flexi Hook and Loop Fastener makes life easy. Can be attached to the waiststrap belt.

0400

Size: One Size

- Flexible — choose between many different accessories and combine them according to your particular needs

MATERIAL: Main: 100% Polyester

## 9082 Flexi Hammer Holder

A popular standard. A metal hammer holder that features a smart, secure design. Ready for on-the-job action.

0000

Size: One Size

- Fits tool fasteners on Snickers trousers and waistcoats and Snickers Flexi Pocket system

MATERIAL: Main: 100% Metal

# Versatile tool vests.

Offering excellent comfort and smart tool storage, these functional vests are easy to adjust and can be worn over a T-shirt, sweatshirt, or even a thick winter jacket.

## 4250 Tool Vest

**Versatile tool vest built for everyday use on the job. The vest provides durable and reliable tool-carrying functionality as well as plenty of options for practical storage.**

0404

Fit: Regular

Size: XS-3XL

Everyday use tool vest that offers excellent tool carrying and plenty of options for practical storage. The vest features mesh ventilation at the front that ensures efficient breathability during intense work. Wide and adjustable shoulder straps and an elastic at the back provide smooth comfort while an integrated belt reduces pressure on shoulders. In addition, an integrated inside expander makes it possible to wear the vest with or without a jacket.

- CORDURA®-reinforced pockets
- Mesh ventilation
- Integrated inside expander
- Wide adjustable shoulder straps
- Integrated belt

**MATERIAL:** Main: 71% Polyamide, 29% Cotton 256 g/m<sup>2</sup>,  
**Pocket Reinforcement:** 100% CORDURA® Polyamide 212 g/m<sup>2</sup>

## 4254 Toolvest Canvas Stretch Holster Pockets

**Work freely and efficiently with this stretch-fabric toolvest. Designed for easy tool access and ergonomic carrying, it offers reinforced durability and comfort.**

0404

Fit: Regular

Size: XS-3XL

Outstanding working comfort and all the pockets you need are combined in this Toolvest. Built for versatility, it features wide shoulder straps and a stretchy back panel for freedom of movement. The front holster pockets, reinforced with CORDURA® 1000, come with tool loops and angled rear holster pockets for easy access. CORDURA®-reinforced breast pockets include a knife fastener, mobile phone compartment, and an ID badge window. The vest also expands to fit over a jacket, while the adjustable belt reduces shoulder strain.

- Stretch fabric back panel for enhanced comfort and mobility
- CORDURA® 1000 reinforced front holster pockets with tool loops
- CORDURA® reinforced breast pockets with knife fastener, phone compartment, and ID badge window
- The adjustable ergonomic belt relieves pressure from the shoulders
- Adjustable ergonomic belt takes pressure off the shoulders

**MATERIAL:** Main: 63% Polyester, 37% Cotton 360 g/m<sup>2</sup>,  
**Pocket Reinforcement:** 100% CORDURA® Polyamide 200 g/m<sup>2</sup>

# Built for little pros.

Every pro starts somewhere. Snickers Workwear Junior garments are built with the same toughness and functionality as our professional gear. Durable enough for hours of play and designed for the next generation of builders, dreamers, and doers.

The size span reaches all the way up to 164 (age 14), making it possible for older young people to also enjoy the benefits of our products.

## 7575 AllroundWork Junior 4-way Stretch Trousers

Kickstart craftsmanship early with these 4-way stretch trousers. Made for both indoor and outdoor activities, they have holster pockets, reflective details, and are perfect for young skill seekers.

In the picture you see size 140.

**Fit:**  
Regular

**Size:**  
98-164

Designed for the next generation of artisans, these workwear trousers prioritize safety with multiple reflective details and easily detachable holster pockets. Made from a 4-way stretch fabric, they offer mobility and wind protection. The waist can be adjusted using both a buckled belt and an inner, buttoned elastic waistband. Made with reinforced knees and leg endings for added protection and durability plus an adjustable hem length that accommodates your growing child.

- Windproof softshell fabric with 4-way stretch
- Reflective details for enhanced visibility and safety
- Detachable holster pockets
- Leg length is adjustable to suit your growing child
- CORDURA<sup>®</sup> reinforced stretch-knees

**MATERIAL:** Main: 88% Polyester, 12% Elastane 238 g/m<sup>2</sup>, Contrast: 65% Polyester, 35% Sorona Polyester 210 g/m<sup>2</sup>, Pocket Reinforcement: 100% CORDURA<sup>®</sup> Polyamide 212 g/m<sup>2</sup>, Knee Reinforcement: 100% CORDURA<sup>®</sup> Polyester 330 g/m<sup>2</sup>

**SUSTAINABILITY:** Sorona<sup>®</sup> Polyester

\* New colour

## 7505 FlexiWork Junior Trousers

It's never too early to learn a craft. These work trousers love to play and are specially designed for children aged 2-14 years. Made of comfortable yet hardwearing Rip-stop fabric and featuring lots of pockets for tools and precious findings.

0404

In the picture you see size 128.

Fit: Regular

Size: 98-164

- Double adjustable waist for optimal fit and comfort
- Reinforced knees and reinforced ankles for enhanced protection and durability
- Reflective features for cool look and enhanced visibility and safety
- Detachable holster pockets (easily removable)
- Adjustable leg length by 1 size up makes them trousers for more than one season

**MATERIAL:** Main: 65% Polyester, 35% Cotton 200 g/m<sup>2</sup>, Stretch: 88% CORDURA® Polyamide, 12% Elastane 275 g/m<sup>2</sup>, **Reinforcement:** 100% CORDURA® Polyamide 212 g/m<sup>2</sup>

**MATERIAL:** Main: 100% Cotton 200 g/m<sup>2</sup>

## 7512 Junior Logo Full-Zip Hoodie

Classic hoodie made of a soft and comfortable fabric. Designed for everyday use.

0400

2800

Fit: Regular

Size: 98/104-158/164

Multi-purpose hoodie made of a soft and smooth fabric with just the right thickness, making it a great choice both for active and leisure wear. In addition, the hoodie features raglan sleeves for enhanced mobility, adjustable hood with drawstring, and a kangaroo pocket. Snickers Workwear high-build, puff-print logo on left sleeve.

- Double interlock fabric
- Raglan sleeves
- Ribbed cuff and bottom hem
- Kangaroo pocket
- 3-edged drawstring in yellow, black, and white

**MATERIAL:** Main: 82% Cotton, 18% Recycled Polyester 280 g/m<sup>2</sup>

**SUSTAINABILITY:** Recycled Polyester

# Make yourself seen.

When worksite visibility decreases, the risk for workplace accidents increase. That's the reason why we work so hard developing and improving our wide range of hard-working, high-visibility workwear.

Our High-Vis collection is regulated by the international standard ISO EN 20471. The standard dictates the requirements that qualify a garment as highly visible, and also categorises them into three classes of visibility, where Class 3 has the highest visibility, and Class 1 the lowest. As you can imagine, a lot of expertise and experience has gone into developing both these standards, and the high-visibility clothing you need on the job. It's all about staying visible, so you can stay safe.

Read more about EN and ISO standards on pages 268–273.

## The difference between fluorescent, reflective and contrast material.

**Fluorescent** yellow and orange materials increase visibility in dusk, dawn and during the day, as well as in fog or haze.

**Contrast** materials are colour-fast so that they won't negatively affect the visibility of a garment's fluorescent and reflective properties. They must be certified according to EN ISO 20471:2013.

**Reflective** materials are designed for increased visibility when illuminated in dim and dark conditions.

### Orange is the cold yellow

What's the difference between fluorescent orange and fluorescent yellow? Remember, this is all about increasing visibility, and it's usually a lot easier to spot someone wearing a neon yellow garment than an orange one. That's because yellow has a higher luminance, or appears brighter to the naked eye.

However, in a snowy winter landscape the luminance of yellow is outdone by the higher contrast of orange — especially against a background of white. So in bright snowy weather you'll want to dress in orange, and in most other cases yellow will do the trick.

## 6930 High-Vis Class 2, Trousers Detachable Holster Pockets

High-visibility trousers made with 4-way stretch softshell fabric, detachable holster pockets, and segmented reflective transfers. Certified to EN ISO 20471, offering reliable protection in low-light environments.

6604

CE

Fit:  
Slim

Size:  
88-116, 44-64,  
148-154

These exceptional high-visibility trousers are designed for professionals in construction, facility management, and roadwork. Made from wind-protective, 4-way stretch softshell fabric, they offer flexibility and comfort throughout demanding workdays. Reinforced with 3-layer CORDURA® at the lower legs for durability and protection in wet conditions, these trousers also feature pre-bent legs and reinforced leg endings for comfort and freedom of movement. Certified to EN ISO 20471 Class 2 for visibility and EN 14404 for knee protection, they offer reliable safety in low-light settings. Key features include detachable CORDURA®-reinforced holster pockets with zippered compartments, a CORDURA®-reinforced ruler pocket, and a cargo pocket with an ID badge holder. An integrated belt with a Duraflex® buckle, tool holders, and hammer holders add to their functionality. In addition, 2-way zippers at the bottom of the legs offer a customized fit.

- Certified according to EN ISO 20471 Class 2
- KneeGuard™ with full stretch Armortex® Kevlar® fiber by DuPont™, certified to EN 14404
- 4-way stretch softshell fabric

### 6934 High-Vis Class 1, Stretch Work Trousers Holster Pockets

Slim-fit work trousers designed for general construction work at worksites with demands for high visibility. Elastic fabric and pre-bent legs provide great comfort and freedom of movement.

0466

CE

Fit:  
Slim

Size:  
88-124, 44-64,  
146-162, 250-258

High-visibility work trousers made of durable and elastic Sorona® ripstop fabric. The trousers also feature 4-way stretch panel at crotch and back for enhanced flexibility and make a good choice for craftsmen who work both inside and outside at worksites with demand for visibility. In addition, the work trousers have pre-bent legs, a leg pocket with attachment for ID badge, a ruler pocket, and reinforced holster pockets. They come in slim fit and include a belt for optimal fit at waist.

- Durable Sorona® ripstop fabric with stretch
- High visibility, certified according to EN ISO 20471 Class 1
- Segmented reflective transfer
- KneeGuard™ Pro system certified according to EN 14404
- Zip ventilation at inner thighs
- CORDURA® stretch at knees for flexibility and durability

**MATERIAL:** Main: 64% Polyester, 36% Sorona Polyester 225 g/m<sup>2</sup>,  
**Reinforcement:** 100% CORDURA® Polyamide 212 g/m<sup>2</sup>,  
**Knee Reinforcement:** 53% CORDURA® Solution dyed Polyamide (PA),

CE

Fit:  
Regular

Size:  
XS-3XL

This versatile winter jacket is built for professionals working in harsh outdoor environments, with pre-bent sleeves for flexibility and comfort. Certified to EN ISO 20471 for Class 2/3 high visibility, it provides protection in low-light and cold conditions. This durable jacket has transfer reflectives, two outer zipped chest pockets (one with an ID badge holder) and two front hand pockets lined with brushed tricot for warmth. The interior offers plenty of storage with two pen compartments, two stow pockets, and an inner zipped chest pocket. Brushed tricot inside the collar ensures comfort, while a drawstring at the bottom hem and adjustable straps provide a custom fit. The dropped back offers wind protection, and small inner sleeve cuffs help retain warmth. This jacket is perfect for road workers, construction workers, and carpenters needing reliable protection and storage in cold environments.

- Certified according to EN ISO 20471 Class 2/3 and EN342
- Pre-bent sleeves for freedom of movement
- High collar for comfort
- Interior pockets: one zipped chest pocket, two stow pockets, two pen compartments
- Exterior pockets: two zipped chest pockets, two zipped front hand pockets
- Dropped back for wind protection

**MATERIAL:** Main: 100% Polyester 220 g/m<sup>2</sup>, Contrast: 100% Polyamide 250 g/m<sup>2</sup>, Lining: 100% Solution Dyed Polyamide 65 g/m<sup>2</sup>, **Padding:** 90% REPVEVE® Polyester (PES), 5% Polyester (PES), 5% Recycled Polyester (PES) 120 g/m<sup>2</sup>

**SUSTAINABILITY:** Recycled Polyester / REPVEVE® Polyester / Solution Dyed Polyamide (PA)

## 1532 High-Vis Class 2/3, Jacket

## 1230 High-Vis Class 3, Softshell Jacket

Softshell work jacket that combines high visibility, amazing fit and hardwearing comfort with advanced functionality. It is windproof and water-repellent and makes a great choice for everyday work all year round.

5504\*

6604\*

6695

CE

Fit:  
Slim

Size:  
XS-3XL

Windproof and water-repellent high-vis jacket designed for everyday work in areas that require Class 3 visibility. This versatile work jacket is made of a functional softshell fabric and comes with CORDURA®-reinforced elbows for added durability. Dropped sleeve ends offer extra protection without hampering performance while dropped back ensures protection in all working positions and bottom. In addition, bottom hem adjustment provides flexibility while YKK 2-way zipper makes it possible to open the jacket from below for access to tools underneath and for enhanced range of movement when necessary. The jacket also features an inside stow pocket. Plenty of space for profiling.

- High visibility, Class 3 (EN ISO 20471)
- Engineered fit with pre-bent CORDURA®-reinforced elbows for maximum freedom of movement
- Fleece-lined and high wind-protective collar keeps you warm and comfortable
- Heat-sealed reflective tape on sleeves, shoulders and around the body for maximum visibility and safety. (Due to space limitations, size XS do not have reflective tape on the shoulders.)
- Elastic cord adjustment at bottom hem for a stretchy, tight fit at bottom
- YKK 2-way zipper

**MATERIAL:** Main Fabric: 100% Polyester, 265 g/m².  
**Reinforcement:** CORDURA® 100% Polyamide, 205 g/m²

**SUSTAINABILITY:** Solution Dyed Polyester

# Stay protected with ProtecWork.

ProtecWork is a collection of protective wear that combines expert know-how of heat and flame protection with Snickers Workweares renowned ergonomics and fit. The result is a cutting-edge collection that offers inherent heat and flame protection, excellent durability, great comfort and an ergonomic, modern fit.

14116

Read more about EN and ISO standards on pages 268-273.

## A collection built on years of experience protecting professionals.

### Developed in close partnership with professionals.

Our protective wear is the result of a long and successful partnership with professionals working in hazardous conditions. They're the ones working in high-risk environments, and the only ones who truly know how protective wear is used and functions in the real world. This close partnership has resulted in several innovative features, such as symmetrical leg pockets and DuPont™Kevlar® reinforced pockets.

### 100% inherent protective wear.

Our mission is to provide clothing that protects against burns. All our fabrics are therefore inherent, meaning that the heat and flame protection is built into the fibre. Our main inherent fibre is modacrylic, which combines high flame retardancy with low density. This means that the protective garments can be built with relatively lightweight materials, offering comfort and freedom of movement for the wearer. In addition, modacrylic also provides good protection against electric arc. Ergonomics is also a very important aspect when we develop our protective wear. Garments that provide great fit and optimal mobility tend to be used more often, contributing to increased protection, greater comfort, and enhanced efficiency.

### Layer up to increase your protection.

One of the best ways to improve your level of protection is to wear layers (all layers/garments must of course be certified and flame retardant). The main benefit of wearing layers is that the air gap formed between different garments provides increased protection. There is no general rating for how much increased protection the air gap between layers provides, although we have conducted a number of tests that show that the air gap increases protection by approx. 5 cal/cm<sup>2</sup> per layer.

### Standards and requirements dictate our design.

Our product development always starts with the items intended use and the task at hand. What are the risks in the work environment? What do the standards require? And what does the wearer need in order to perform optimally? Working based on these facts and requirements, and by conducting thorough tests through-out the entire process, we develop functional, comfortable and above all safe Personal Protective Equipment.

## 6273 ProtecWork Stretch Work Trousers Holster Pockets

Protal<sup>®</sup>

Soft and versatile long-sleeve shirt developed for safety and comfort in hazardous or high-risk work environments. Made from an inherently flame-retardant modacrylic/cotton blend with antistatic properties, the garment provides certified protection against heat, flame and electric arc as well as welding Class 1. The shirt also protects against lighter chemicals according to EN ISO 13034 PB[6]. Two large chest pockets with flaps. Left chestpocket has two compartments for pens. In addition, the push-button design ensures quick removal in emergency situations. Adjustable sleeve width and hanger in yoke seam center back. Suitable for use on its own or as a mid layer in combination to reach higher protection levels. Use instead of jacket in warm environments. Easy-care, wrinkle-resistant fabric certified according to OEKO-TEX<sup>®</sup> Standard 100. Suitable for profiling.

- Inherent heat and flame protection
- Arc protection: ELIM 6,1 cal/cm<sup>2</sup>, APC 1 (4kA)
- Exterior pockets: 2 chest pockets with pocket flaps closing with hidden push buttons. Left chest pocket with 2 pen compartments.
- Press-button closure for quick removal and chest pockets with pen compartments
- Antistatic properties

**MATERIAL:** Main: 55% modacrylic Protal<sup>®</sup>, 44% cotton, 1% antistatic, 215 g/m<sup>2</sup>.

## 6274 ProtecWork Stretch Work Trousers Holster Pockets, High-Vis Class 1

Personal protective 2-way stretch trousers that offer reliable protection in high-risk work areas and hazardous environments. In addition they offer 20471 Class 1 visibility. Designed with a clean look with inherent FR stretch fabric for excellent comfort. Advanced holster pockets included in style.

Protex

Durable protective jacket that provides working comfort, high visibility and protection in high-risk work areas or hazardous environments. Safety is provided by inherent heat and flame protection with antistatic properties. The jacket offers certified protection against electric arc and welding. Flame-retardant lining at front, shoulders and sleeves provides enhanced protection for commonly exposed body parts. For sleeves and front, the ATPV value is 27.6 cal/cm², APC 2. Enhanced freedom of movement by stretch panels in back. Features include pre-bent sleeves with dropped ends and adjustable sleeve width. Front placket with hidden buttons. Four outer pockets – including two side pockets with flaps, one spacious zip pocket for documents or tablet and a zipped chest pocket with internal ID-card holder. Extra reflectives at shoulders enhance visibility from above. Adjustable elastic in bottom edge. The jacket also comes with a shorter front to provide easy access to tools and items in the trouser pockets. Hanger in neck. Easy-care, wrinkle-free fabric certified according to OEKO-TEX® Standard 100. Suitable for profiling.

- Inherent heat and flame protection
- Arc protection: ELIM 13 cal/cm² APC 1 (4kA), Front and sleeves: ATPV 27.6 cal/cm² APC 2 (7kA)
- Class 1 visibility
- Exterior pockets: 2 side pockets with flaps, 1 zip pocket for tablet and 1 zipped chest pocket with internal ID-card holder
- Stretch panels for extra freedom of movement
- High collar for extra neck protection

**MATERIAL:** Main: 49% modacrylic Protex®, 42% cotton, 5% aramid, 3% polyamide, 1% antistatic fiber, 300g/m². **Lining:** 50% meta-aramid, 50% viscose FR, 120 g/m².

## 8560 ProtecWork Long Sleeve Shirt, High-Vis Class 1

Light weight long-sleeve shirt that provides protection when working in high-risk areas. Versatile shirt certified for heat, flame, arc-flash, welding class 1 also featuring antistatic properties. Class 1 visibility offers extra safety in low-light conditions.

9566

CE

Soft and versatile long-sleeve shirt developed for safety and comfort in hazardous or high-risk work environments. Made from a light weight inherently flame-retardant modacrylic/cotton blend with antistatic properties, the garment provides certified protection against heat, flame and electric arc as well as welding Class 1. The shirt also protects against lighter chemicals according to EN ISO 13034 PB[6]. High visibility Class 1 for enhanced safety in low-light conditions. Two large chest pockets with flaps. Left chestpocket has two compartments for pens. In addition, the push-button design ensures quick removal in emergency situations. Adjustable sleeve width and hanger in yoke seam center back. Suitable for use on its own or as a mid layer in combination to reach higher protection levels. Use instead of jacket in warm environments. Easy-care, wrinkle-resistant fabric certified according to OEKO-TEX® Standard 100. Suitable for profiling.

- Inherent heat and flame protection
- Arc protection: ELIM 6,1 cal/cm², APC 1 (4kA)
- High visibility Class 1
- Exterior pockets: 2 chest pockets with pocket flaps closing with hidden push buttons. Left chest pocket with 2 pen compartments.
- Press-button closure for quick removal and chest pockets with pen compartments
- Antistatic properties

**MATERIAL:** Main: 55% modacrylic Protal®, 44% cotton, 1% antistatic, 215 g/m².

Protex

Regular fit flame-retardant pirate trousers. The pirates offer inherent flame protection and also feature antistatic properties. The ripstop weave ensures longevity and modacrylic fabric ensures comfort. In addition, a heat-seal reflective combined with fluorescent material provides Class 2 visibility to ensure safety in dim light conditions and risk environments. Stretch gusset in crotch for enhanced comfort and movement. Pre-bent legs ensure comfort while KneeGuard™ system offers reliable knee protection. Two practical side pockets and two back pockets with bellow and pocket flaps. Our classic equal leg pockets offer safe and durable storage and DuPont™ Kevlar®-reinforced ruler pocket enables storage of sharp tools such as screwdrivers. The equal easy-to access leg pockets include one large bellow pocket with mobile phone compartment inside, pen pocket and knife holder. Detachable ID-badge inside left leg pocket. Double tool holders in waist. Hanger in back. Fabric certified according to OEKO-TEX® Standard 100. Suitable for profiling.

MATERIAL: 42% modacrylic, 30% spandex, 26% cotton, 2% antistatic

## 9261 ProtecWork Wool Terry Socks

0400

EN ISO 14116:2015 Index 3

Flame retardant terry-knit wool socks with loose fit for optimal comfort. Made of wool, which provides natural moisture transport and great insulation. Furthermore, the terry-knitting technique offers soft shock-absorption for a smooth stride.

14116

Fit: Loose

Size: 37-39, 40-42, 46-48

Flame retardant, soft, terry-knit wool socks with loose fit for optimal comfort. Made of wool, which provides natural moisture transport and great insulation, these socks keep your feet warm and dry in cold conditions. Furthermore, the terry-knitting technique offers soft shock-absorption for a smooth stride.

- Inherent flame protection
- Wool provides great insulation
- Terry offers shock absorption
- Loose fit

**MATERIAL:** 37% Wool, 37% Viscose FR, 20% Polyamide, 6% Lycra

## 9262 ProtecWork Light Wool Socks

0400

EN ISO 14116:2015 Index 3  
EN ISO 1149-5:2008

14116

1149-5

Fit: Regular

Size: 37-39, 40-42, 46-48

**Belltron™**

Flame retardant, durable work socks that feature an ergonomic design for a perfect fit. The socks also come with ribs at gusset and around the arch to stay in place, as well as thin toe seams to minimize chafing. Made of wool, which provides natural moisture transport and great breathability. Antistatic properties.

- Inherent flame protection
- Wool provides great insulation
- Ergonomic, foot-shaped design for optimal fit
- Ribs at gusset and around the arch keep the socks in place
- Thin toe seams to avoid chafing
- Antistatic properties

**MATERIAL:** 52% wool, 34% viscose FR, 11% polyamide, 2% antistatic, 1% elastane

## 9264 ProtecWork Heavy Wool Socks

0400

EN ISO 14116:2015 Index 3

Flame-retardant, durable heavy socks combine the natural functional properties of wool to keep your feet warm and dry in truly cold conditions. In addition, the socks come with ribs at gusset and around the arch to stay in place. Thin toe seams minimize chafing, while ergonomic design ensures a perfect fit.

14116

Fit: Regular

Size: 37-39, 40-42, 46-48

When it's really cold, wool is the only answer. These heavy socks combine the natural functional properties of wool to keep your feet warm and dry in truly cold conditions. In addition, the socks come with ribs at gusset and around the arch to stay in place. Thin toe seams minimize chafing, while ergonomic design ensures a perfect fit.

- Inherent flame protection
- Heavy wool for optimal warmth
- Ergonomic, foot-shaped design for optimal fit
- Ribs at gusset and around the arch keep the socks in place
- Thin toe seams to avoid chafing

**MATERIAL:** 44% wool, 44% viscose FR, 11% polyamide, 1% elastane.

### 9787 ProtecWork Multi Function Holster Pockets

6695

Flame retardant durable advanced holster pockets feature several pockets and tool loops that will help you work more efficiently. Designed to be worn in belt.

Fit: Regular

Size: One Size

Looking for a quick and easy upgrade of your workwear? These durable holster pockets feature several pockets and tool loops that will help you work more efficiently. Designed to be worn as an accessory in belt. NOTE! We do not recommend using these holster pockets on trousers certified according to EN ISO 11611 and/or EN ISO 11612 D+E and/or EN 13034, which require that pockets should be closed. Easy-care, wrinkle-resistant fabric certified according to OEKO-TEX® Standard 100.

- Inherent heat and flame material
- Multipurpose, advanced design
- Many webbing tool loops both outside and inside the pockets
- Extra tough DuPont™ Kevlar® fiber reinforcement inside tool pocket for enhanced durability
- Zipped compartment on the left pocket

**MATERIAL: Main:** 49% modacrylic Protex®, 42% Cotton, 5% Aramid, 3% Polyamide, 1% Antistatic, 300g/m²  
**Reinforcement:** 54% Polyester 24% Aramide, 13% Polyamide, 9% Polyurethane, 450 g/m².

### 9797 ProtecWork Holster Pockets

6695

Flame retardant durable holster pockets. This is a stripped down version of 9783, when less is more. Designed to be worn in belt.

Fit: Regular

Size: One Size

Upgrade your work trousers with these classic holster pockets, featuring two large pockets. Designed to be worn as an accessory with a belt. NOTE! We do not recommend using these holster pockets on trousers certified according to EN ISO 11611 and/or EN ISO 11612 D+E and/or EN 13034, which require that pockets should be closed. Easy-care, wrinkle-resistant fabric certified according to OEKO-TEX® Standard 100.

- Inherent heat and flame material
- Clean design, less pockets & loops

**MATERIAL: Main:** 49% modacrylic Protex®, 42% Cotton, 5% Aramid, 3% Polyamide, 1% Antistatic, 300 g/m²

### 9779 ProtecWork Holster Pockets, High-Vis

5595

Flame retardant holster pockets that offer enhanced visibility and extra storage possibilities.

Fit: Regular

Size: One Size

Upgrade your work trousers with these flame retardant high-visibility holster pockets, designed to be worn together with a waistbelt. The fabric offer inherent protection against heat, flame and electric arc and also meet the requirement of Railway Group Standard RIS-3279-TOM. Feature two large pockets and outside pockets with several small compartments. Easy-care, wrinkle-resistant fabric certified according to OEKO-TEX® Standard 100.

- Inherent heat and flame material
- Materials arc protection value: ELIM 8 cal/cm², APC 1 (4kA)
- Materials orange colour in compliance with RIS-3279-TOM
- Attach with belt to trousers

**MATERIAL:** 31% polyester FR, 28% modacrylic, 20% Aramid Kermel®, 20% CV FR, 1% antistatic fiber, 320 g/m²

# Personal protective equipment.

---

## **Personal Protective Equipment (PPE) Regulation (EU) 2016/425.**

The overall purpose of the Personal Protective Equipment (PPE) Regulation is to define rules for equipment designed and manufactured to be worn or held by a person for protection against one or more risks to that person's health or safety.

Further information is available from the European Commission at [ec.europa.eu](https://ec.europa.eu)

Garments marked with a user instruction symbol have a guide which contains important information for the user to take into consideration when choosing PPE. How to understand the

markings in the garment, how to use the PPE and how to take care of the garment in order to retain the protection offered.

## **EN ISO 20471 High visibility clothing.**

EN ISO 20471 specifies requirements for clothing capable of signaling the user's presence visually. Performance requirements are included for color and retro reflection as well as for minimum areas and for the disposition of fluorescent and reflective materials.

The norm includes three different classes where class 3 has the highest visibility. For each class, the norm dictates the area and placement of the fluorescent, reflective and contrast

materials, respectively. None of the fluorescent and reflective materials can replace the other in calculating areas as the purpose differs.

Garments can be combined to achieve a higher level of visibility and class. However, it's not always that 1+2 equals 3. It all depends on the size of the area of the material in question (fluorescent and reflective), as well as design requirements.

## EN ISO 11612

### Protective clothing against heat and flame.

EN ISO 11612 specifies performance for clothing designed to protect from heat and/or flame (not including protection for firefighters and welders). The norm indicates protection against ignition from various heat sources: (A) limited flame spread, A1 surface ignition and A2 edge ignition, according to test method ISO15025; (B) convective heat and open flames, according to test method ISO9151; (C) radiant heat, according to test method ISO6942; (D) molten aluminum splash, according to test method ISO9185; (E) molten iron splash, according to test method ISO9185; and (F) contact heat (flat iron, hot plate etc.), according to test method ISO12127-1.

Garments certified according to EN ISO 11612 should be used together with other protective clothing that meets

the requirements of EN ISO 11612. Furthermore, the norm requires full protection of arms and legs, which means t-shirts and shorts do not meet the EN ISO 11612 requirements. However, the user can wear clothes certified according to EN 14116 (which does not have the same design requirements) underneath for enhanced protection.

To ensure full protection, the head, neck, hands and feet must be covered with other approved protective clothing. Note that garments classified as underwear should always be worn together with outer garments that meet the protection requirements of EN ISO 11612. The underwear will not provide the right level of protection on their own.

## EN ISO 14116

### Protective clothing against flame.

EN ISO 14116 specifies the performance of protective clothing for workers exposed to occasional brief contact with open flames with no other thermal risks. This norm is a "lighter" version of EN ISO 11612 and is relevant for garments without full-length sleeves and legs as well as accessories such as hats, beanies, balaclavas, socks, underpants etc.

EN ISO 14116 is available in three different indexes — 1, 2 and 3, where Index 3 stipulates the highest protection requirements. Materials classified as Index 1 must not be worn next to skin and garments that contain Index 1 materials should only be worn on top of Index 2 or 3 garments.

## EN 61482-2 / IEC 61482-2

### Clothing for protection from the thermal hazards of an electric arc.

Despite all the measures in place a large number of electric arc accidents occur every year. EN 61482-2 (former IEC 61482-2) specifies requirements for clothing protecting against the thermal hazards of an electric arc. These clothes belong to the Risk III category, which defines garments used in high-risk environments, and which are certified to eliminate second-degree burns in the event of an electric arc flash (flashover).

In order to measure the product's level of protection, the garment is subjected to two different test methods: an open arc test and a box test. The test methods use different test set-ups, arc configurations, test parameters, test procedures and result parameters. The results from the different methods of testing can be neither physically compared nor mathematically converted to those from the other form of testing. The arc rating has to be tested and assessed by either one or the other method. In a box test, the object is subjected to a directed arc flash of either 4kA (APC -Arc protection class - 1) or 7kA (APC 2).

#### ELIM — eliminate the risk of a second-degree burn

The incident energy limit (ELIM) defines the energy level at which you avoid the risk of a second-degree burn. Remember, however, that there is still a risk of getting a first-degree burn injury. The ELIM value is a calculated value, and is always lower than ATPV or EBT50, since you eliminate the risk of 50% risk

of 2nd degree burn. It is calculated from the average of the three highest incident energy data points without breakopen, shrink-open and which do not exceed the Stoll curve. The three incident energy data points are taken just below the mix zone in the test report. The Stoll curve determines the rating of the transfer of heat energy (calories) based on the time of transfer and the level of heat energy produced.

#### ATPV or $E_{BT50}$

With the open arc method, the test result is given in calories — cal/cm<sup>2</sup>. The calorie value gives you an indication of how much heat/energy exposure you could withstand before you risk a 50% chance of getting a second degree burn. As well as a result in calories, an ATPV (Arc Thermal Performance Value) or  $E_{BT50}$  (Energy Break-open Threshold), when holes begin to form in the fabric) value is also specified. Neither value is better than the other. Basically, garments/fabrics that get an  $E_{BT50}$  value are typically more insulating than they are strong and ATPV garments/fabrics are usually stronger than they are insulating.

**NOTE!** All garments worn must protect against electric arc! Including underwear, socks, gloves, underpants and t-shirts or shirts worn underneath the outer layer. And remember that the more layers of electric-arc-protective clothing you wear, the higher your protection.

## EN 13034

### Protective clothing against liquid chemicals.

Specifying the requirements for clothing offering limited protection against liquid chemicals, EN 13034 targets professions and situations in which the wearer relatively easily can step out from the risk environment and quickly remove the garment. Typical professions include truck drivers who drive gasoline transports and service technicians who occasionally handles lubricants, acids etc. For tougher environments with higher risks, higher protection garments are required.

The classification Type 6 refers to full chemical overalls whereas Type PB refers to partial body protection, for example jackets and trousers.

The norm's design requirements state that the garment should include no features that may collect liquid chemicals and hold them onto the fabric surface (such as unprotected pockets etc).

**NOTE!** Since liquid chemicals often are flammable, the user should wear antistatic clothing for optimal protection as well as flame retardent clothing. EN 13034, EN ISO 11612 and EN 1149 make a great combination for this purpose.

## EN ISO 11611

### Protective clothing for use in welding and allied processes.

EN ISO 11611 specifies material performance and design requirements for clothing developed to protect against heat and flame and welding. Essentially the welding version of EN ISO 11612, this norm defines protection against ignition from various heat sources, such as open flames, molten iron splash and contact heat. In addition, garments certified according to EN ISO 11611 protect against radiant heat from the arc as well as minimize the possibility of electrical shock by short-term, accidental contact with live electrical conductors.

EN ISO 11611 features two classes, Class 1 and Class 2, depending on the type of welding technique used. Class 1

comprises less hazardous welding techniques and situations, lower levels of spatter (splashes of molten metal) and radiant heat, whereas Class 2 includes more hazardous welding techniques and situations, higher levels of spatter and radiant heat.

The norm also includes several design requirements, such as that suits should completely cover the upper and lower torso, neck, arms and legs, and that external pockets should be covered by flaps at least 20 mm wider than the opening of the pocket.

## EN 342

### Protective clothing against cold.

EN 342 specifies the requirements and performance of clothing designed to protect against cooling of the body in cold environments. It is possible to certify single garments as well as an entire outfit in several layers.

Wearing several layers is a great way of increasing insulation and enhance the protection against cold. The layered outfit also makes it easy to adjust to rapid temperature changes.

Remember that sweating should be avoided during continuous cold exposure, since moisture absorption will progressively reduce insulation. In addition, wind increases the need for protection. In the User's Guide that comes with each garment you can see correlation between temperature, wind speed and level of activity for the wearer to see under what conditions you can work.

There will be items in our range that remain certified under the old standard EN 14404:2010, while several new styles will be launched and certified according to the new standard EN 14404-3:2024. For products certified according to 14404:2010, the certification is valid as long as our certificates remain valid.

## EN 14404:2010 Knee protection.

This standard encompasses the size, force distribution, penetration resistance and usage of kneepads.

### Type 2 – integrated knee protection

Work in a kneeling position involves the risk of chronic conditions such as prepatellar bursitis and cartilage injuries caused by continuous pressure on the knees. Knee protection is therefore recommended for all work in a kneeling position. The protection should distribute forces evenly and prevent hard objects on the ground from causing injuries. It is important that knee protectors do not compromise venous drainage in the leg while kneeling or standing up. It must therefore be easy for workers to change position and to stand up to re-establish a normal blood circulation at frequent

intervals while wearing knee protectors. We use Type 2 knee protectors in our products. For this type, the knee protection is integrated with the trousers, which means that wherever you go your knees are always protected. For Type 2 setups, the knee protectors and the trousers are co-certified, ensuring safe and secure protection.

### Various levels of protection

Knee protection is also classified in three performance levels. Level 0 includes knee protectors suitable only for use on flat surfaces and providing no protection against penetration. Level 1 and 2 items, however, are suitable for use on both flat and non-flat surfaces in harsher conditions and provide protection against penetration at forces of various degrees.

## EN 14404:2024 Knee protectors for work in the kneeling position.

This standard encompasses the size, force distribution, penetration resistance, and usage of kneepads. Work in a kneeling position involves the risk of chronic conditions such as prepatellar bursitis and cartilage injuries caused by continuous pressure on the knees. Knee protection is therefore recommended for all work in a kneeling position. The protection should distribute forces evenly and prevent hard objects on the ground from causing injuries.

It is important that knee protectors do not compromise venous drainage in the leg while kneeling or standing up. It must therefore be easy for workers to change positions and stand up to re-establish normal blood circulation at frequent intervals while wearing knee protectors.

The standard is divided into six parts. Part 2 contains requirements for type 1 kneepads, and Part 3 includes the requirements for type 2 kneepads. Our current assortment includes both type 1 and type 2 kneepads.

### Part 2: Requirements for wearable knee protectors (type 1)

Personal protective equipment that protects the knee independently from other garments and is worn on the leg.

### Part 3: Requirements for the individual combination of kneepads and garments (type 2)

Combination of a garment with knee pockets or other means of attachment and pads for forming the knee protection, or a specific combination of an individual pad and a correspondingly designed garment. For type 2, the knee protection and trousers are co-certified, ensuring safe and secure protection.

### Various levels of protection

Knee protection is also classified into four performance levels. Level 0 includes knee protectors that provide no penetration protection and are only suitable for flat, even surfaces. Level 1 is designed to offer basic penetration protection on flat surfaces, while Level 1U provides the same level of protection but is specifically tested and approved for uneven surfaces. Level 2 offers the highest standard, delivering superior protection and force distribution, particularly on uneven surfaces.

## EN 1149-5 Protective clothing electrostatic properties.

EN 1149-5 specifies material performance and design requirements for protective clothing with electrostatic properties. These protective clothes are designed to avoid the risk of incendiary discharge (the formation of sparks), when for example an elbow or a knee is brushed against a wall or similar surface/object. This is vital when working with flammable materials such as gas or gasoline.

The material performance is based on the material's surface resistivity, electrical resistance and/or charge decay. In

order to be fully protected, all non-complying materials and conductive parts (zippers etc) should be fully covered. In addition, the person must be properly earthed by wearing shoes that allow static electricity to dissipate into the ground.

**NOTE!** EN1149-5 certification is not sufficient for work with fine electronics and similar sensitive electronics (microchips, printed circuit boards, cell phone assembly, etc). For this kind of work, you need protective clothing certified according to EN 61340.

## EN 343 Protective clothing against rain.

Rain doesn't only make you wet, but also cold, hampering your work performance.

EN 343 specifies the performance and requirements of clothing protecting against rain and vapor. The norm defines the water penetration resistance of the garment's fabric and seams and water vapor resistance. Both feature four classifications — 1, 2, 3 and 4 — where classification 4 indicates the best performance. Ready-made garment rain tower test (R) is optional and will be replaced with X if garment has not been tested.

Remember that although a certified product protects against rain, the wearer can still be wet and cold from the inside through heavy sweating and lack of efficient ventilation (breathability) in the garment. To minimize the accumulation of moisture vapor (sweat) from the body, the user should choose garments based on the work intensity. The higher intensity, the higher breathability is needed, and vice versa.

## EN 388 Protective gloves against mechanical risks.

This standard applies to all kinds of protective gloves in respect of physical and mechanical aggressions caused by abrasion, blade cut, tear, puncture and, if applicable, impact.

A performance level is determined according to each test result — the higher the number or ascending letter, the greater the level of protection. Results are displayed using a pictogram, permitting clear understanding of the capability of the glove.

**a. Resistance to abrasion:** based on the number of cycles required to abrade through the sample glove. The resistance to abrasion is measured by the number of cycles required for hole to occur. Highest protection is 4 and is equal with 8000 cycles.

**b. Circular blade cut resistance:** based on the number of cycles required to cut through the sample by a circular rotating blade at a constant speed. The result is compared with a reference material and an index is obtained. Highest protection is 5 and is equal with an index of 20.

**c. Tear resistance:** based on the amount of force required to tear the sample. The resistance to tear is defined as the force necessary to propagate a tear in a rectangular specimen slit half way along its length. The specimen shall be torn totally apart. Highest protection is 4 and is equal with 75 Newton.

**d. Puncture resistance:** based on the amount of force required to pierce the sample with a standard sized point and speed (10 cm/min). Highest protection is 4 and is equal with 150 Newton.

In all cases, 0 indicates the lowest level of performance, as follows. These are the requirements for each performance levels. The performance level is displayed alongside the pictogram.

**e. Straight blade cut resistance:** based on a straight blade drawn across the sample until cut-through takes place and measures the contact load applied to the blade to make a cut-through over a 20 mm stroke length. The performance levels range from 'level A' cut resistance with a contact force between 2N and 5N, up to 'level F', with a contact force greater than 30N.

**f. Impact resistance:** This is an optional test and is used for gloves which incorporate specific impact-resistant properties which may be added to the palm, back of the hand or the knuckles. Testing is carried out in accordance with clause 6.9 of EN 13594:2015 — 'Protective gloves for motorcycle riders'. A marking code 'P' is added for gloves meeting the impact-resistant requirements.

| Performance level                    | 0            | 1        | 2        | 3                    | 4        | 5        |
|--------------------------------------|--------------|----------|----------|----------------------|----------|----------|
| a. Abrasion resistance (cycles)      | <100         | 100      | 500      | 2000                 | 8000     | —        |
| b. Blade cut resistance (factor)     | <1.2         | 1.2      | 2.5      | 5.0                  | 10.0     | 20.0     |
| c. Tear resistance (newton)          | <10          | 10       | 25       | 50                   | 75       | —        |
| d. Puncture resistance (newton)      | <20          | 20       | 60       | 100                  | 150      | —        |
| <b>Level</b>                         | <b>A</b>     | <b>B</b> | <b>C</b> | <b>D</b>             | <b>E</b> | <b>F</b> |
| e. Straight blade cut resistance (N) | 2            | 5        | 10       | 15                   | 22       | 30       |
| f. Impact resistance                 | Approved (P) |          |          | Not approved (blank) |          |          |

## EN 407

### Protective gloves against thermal risks.

This standard specifies thermal performance for protective gloves against heat and/or fire. Snickers Workwear has gloves with resistance to flammability.

**a. Resistance to flammability**

(performance level 0 – 4)

**b. Contact heat resistance**

(performance level 0 – 4)

**c. Convective heat resistance**

(performance level 0 – 4)

**d. Radiant heat resistance**

(performance level 0 – 4)

**e. Resistance to small splashes of molten metal**

(performance level 0 – 4)

**f. Resistance to large splashes of molten metal**

(performance level 0 – 4)

Gloves must achieve at least Performance level 1 for abrasion and tear strength.

**X=performance level not tested.**

**Resistance to flammability:** based on the length of time the material continues to burn and glow after the source of ignition is removed. The seams of the glove shall not come apart after an ignition time of 15 seconds.

**Contact heat resistance:** based on the temperature range (100–500 °C) at which the user will feel no pain for at least 15 seconds. If an EN level 3 or higher is obtained, the product shall record at least EN level 3 in the flammability test. Otherwise, the maximum Contact heat level shall be reported as level 2.

**Convective heat resistance:** based on the length of time the glove is able to delay the transfer of heat from a flame. A level of performance shall only be mentioned if a performance level 3 or 4 is obtained in the flammability test.

**Radiant heat resistance:** based on the length of time the glove is able to delay the transfer of heat when exposed to a radiant heat source. A performance level shall only be mentioned if a performance level 3 or 4 is obtained in the flammability test.

**Resistance to small splashes of molten metal:** the number of molten metal drops required to heat the glove sample to a given level. A performance level shall only be mentioned if a performance level 3 or 4 is obtained in the flammability test.

**Resistance to large splashes of molten metal:** the weight of molten metal required to cause smoothing or pinholing across a simulated skin placed directly behind the glove sample. The test is failed if metal droplets remain stuck to the glove material or if the specimen ignites.

## EN 511

### Protective gloves against cold.

This standard applies to any gloves to protect the hands against convective and contact cold down to –50 °C. Protection against cold is expressed by a pictogram followed by a series of 3 performance levels, relating to specific protective qualities. Highest protection is 4.

**a. Resistance to convective cold:** Performance level 0–4.

Based on the thermal insulation properties of the glove which are obtained by measuring the transfer of cold via convection.

**b. Resistance to contact cold:** Performance level 0–4. Based on the thermal resistance of the glove material when exposed to contact with a cold object.

**c. Permeability by water:**

0 or 1. 0 = water penetration after 30 minutes of exposure. 1 = no water penetration.

**X=performance level not tested.**

All gloves must also achieve at least performance level 1 for abrasion and tear according to EN 388.

# Sharpen your profile.

Doing a professional job is the best way to spread the word about your company. Combined with professional profiling you will double the impact. At Snickers Workwear we are happy to assist you with everything from heatsealing and customised embroidery to personalised packaging. All it takes to help you show your skills.

## **T-shirt profiling.**

Heat-sealing is the best choice when profiling your company T-shirts. Count on high quality in any size and colour.

## **Quality embroidery.**

With embroidery you get quality with every stitch, but remember that words or symbols smaller than 5 mm can be difficult to read.

## **Foul weather garments.**

When profiling your waterproof garments, heat sealing is the way to go. If you prefer embroidery, we will tape the rear of the embroidery to make sure the garment retains its waterproof characteristics.

## **Fleece profiling.**

For a company-profiled fleece, embroidery is the obvious choice since heat-sealing might leave marks in the fabric.

## **Reflective stripes.**

We can sew additional reflective stripes onto your work trousers and jackets. A cost-efficient solution to boost your personal protection.

## **High-Vis profiling.**

Profiling High-Vis garments is rather special. Excessively large logos may jeopardise the classification of the garment. For optimum and safe company profiling, please contact us for more information.

At Snickers Workwear we only use high-quality threads to make sure your company logo stands out in the long run.

Our embroidery embodies quality with every stitch. Giving your workwear an image boost that stands out in all the right ways — for a long time to come.

With our advanced heat-sealing technique you get distinctive high-quality prints in the sizes and colours of your choice.

When you order a range of garments for all employees we have the perfect service for you: Personalised packaging. That means everyone gets all his or hers garments in a package labelled with their name. This facilitates easier internal distribution at your company and guarantees that everybody gets the right garments and the right sizes. Easy, convenient and personal.

# Matching design, colours and technical features.

The design philosophy at Snickers Workwear allows you and your team to choose a workwear appearance that reflects your business. By choosing the same styles, colors, or technical features, you ensure a uniform that is not only safe and comfortable but also stylish and professional. In addition, most of our styles also leave plenty of room for profiling.

## 1. Design – consistent silhouette.

Choose workwear with matching designs for a unified look. For instance, our 1106 jacket forms a base for various jackets, pairing perfectly with our AllroundWork trousers for a cohesive appearance.

## 2. Features – choose a series.

Selecting items from the same feature set ensures a unified visual identity. Our collections: AllroundWork, FlexiWork, LiteWork, RuffWork, ServiceWork, High-Vis and ProtecWork make it simple to create a consistent look.

## 3. Colours – align with your brand.

With a wide range of colours available, you can easily select workwear that complements your brand's colour palette for a striking, uniform style.

# Washing advice.

Keep clean to satisfy the standard. And to increase the product's service life.

Your workwear and PPE garments must always be clean to be safe and satisfy the standard. Garments covered in dirt will significantly decrease visibility and other properties and may thereby put you in danger. Frequent washing will also help materials last much longer since dust and dirt may destroy fibres by abrasion. A longer service life for the product is good for both your finances and the environment. The flame and heat protection in protective clothing made of fabrics with inherent flame-resistant properties cannot be washed or worn out. In fact, regular washing ensures that the garments do not contain any dirt or flammable particles that will compromise the protective properties.

## Washing machine.

- Read and follow the washing instructions on the garment's care label.
- Make sure to close all zippers, (press) buttons, hook and loop fasteners, etc. and turn the garment inside out before putting it in the washing machine to prevent damage to the fabric.
- When washing garments with reflective details (reflective stripes etc.), you should always wash the garments inside out. The reflectivity of any reflective material will be reduced every time garments are washed without being turned inside out. Note that damage to the flame-retardant, visibility or reflective properties of the material may not be visible to the naked eye.
- Fill the washing machine to reduce the number of washing cycles.

## Detergents.

- Use organic detergent that is friendly to the environment and your skin to prevent skin irritation.
- Use special wool detergent for woollen garments.
- Do not use more detergent than necessary in order to protect the environment and the fabrics and to avoid lumps of detergent on your clothes.
- Do not use softener, as it may reduce the performance of the fabric as well as contain many hazardous chemicals that are not always listed on the label.
- Softener and soap-based detergents should always be avoided when washing PPE garments as they leave traces of either fat/grease from soap or chemicals that could counteract the properties of the fabrics.

## Temperature.

If the clothes are only slightly dirty, use lower temperatures in order to save energy and protect the fabrics. Washing at 40 degrees instead of 60 degrees saves almost 50 per cent energy.

## Drying.

- Insofar as is possible, dry outside in the air or on a drying rack. However, certain garments must be tumble dried at a high temperature to retain their properties — read the label carefully.
- When using a dryer, do not use a higher temperature than necessary in order to save energy, avoid shrinkage and protect the fabrics.
- Do not let the garments stay in the washing machine after washing, hang them on a drying rack immediately in order to prevent creases.

## Materials.

- To protect fabrics, reflective tapes and prints, turn the garments inside out before washing them.
- Wool is a natural product that can keep itself clean; it does not need to be washed as often as cotton or man-made materials.
- The garment's care instructions should be followed particularly carefully when washing rainwear. Some rainwear has sealed tapes that can be damaged during wash and dry cycles, and other rainwear garments must be tumble dried or ironed to renew the water resistance.

## Never mix certified and non-certified garments.

You should never mix certified garments with non-certified garments in the same wash, since non-certified garments may bleed colours and/or chemicals that will damage the certified garments.

## Damaged garments.

If the garment has been exposed to chemicals or heat/flame, it must be carefully examined to make sure that the fabric is undamaged. If a certified garment needs to be repaired, you must only use approved/certified materials and fabrics.

# Symbols.

These symbols will help you find the right garment. They are used as guides in the product descriptions contained in this brochure. The following definitions apply:

Classic cotton.

Merino wool/wool.

Leather.

Anti Odour.

Breathable.

Insulating.

Moisture Wicking.

Quick Drying.

Compression.

Electrically heated.

Cut protection.

Knuckle protection.

Conductive material for easy use of smartphone.

Impact protection.

Heat protection.

Oil protection.

Isolated.

Waterproof.

Wind proof.

Registered Community Design (RCD) or national design registrations.

Handwash.

Do not tumble dry.

Iron at maximum 150°C.

Maximum washing temp. 40°C.

Tumble drying normal temp.

Iron at maximum 200°C.

Maximum washing temp. 60°C.

Drying flat drip.

Do not dry clean.

Maximum washing temp. 70°C.

Do not iron.

Dry cleaning.

No Bleach.

Iron at maximum 110°C.

# The best materials from the strongest brands.

The right clothing is crucial for a safe and efficient workday. And in order for a garment to function optimally for a specific area of use, it must be made of materials with the right properties. Often several different materials are combined to create the best possible garment. In our quest to design innovative, high-quality workwear, we collaborate with many industry-leading manufacturers of technical fabrics and materials.

## **Armortex®**

Armortex is a DuPont™ Kevlar® fiber used to help provide strength, flexibility, and lightweight protection in everything from yarns and woven ballistic fabrics to ropes and apparel. It's lightweight, durable and extraordinarily strong and used to make a variety of clothing, accessories, and equipment safe and cut resistant.

## ***Belltron™***

### **Belltron™**

Belltron™ offers excellent static control performance by blending small amounts of Belltron™ into the primary fiber of choice. Belltron™ controls static electricity regardless of environment. It has consistent antistatic properties even in absolutely dry conditions.

Belltron™ is not a laminated fiber, but rather a polyester or nylon fiber containing continuously-embedded anti-static particles. No carbon particles can be removed from Belltron™ by rubbing. The static control property is applied inside the fiber, therefore Belltron™ maintains an extremely stable performance even after washing.

Belltron™ is a trademark of KB SEIREN, LTD.

### 37.5° Technology

37.5° Technology regulates your body's microclimate, to help create an optimal working environment within your clothing. By actively responding to your body's natural humidity and infrared energy (IR), patented active particles embedded in the material removes moisture in the vapor stage to help keep you dry. If you get cold, these same active particles capture and return that IR energy to help warm you up.

37.5° fibers are also available with enhanced biodegradation. With very few end-of-life options for textiles available, enhanced biodegradation offers a step in the right direction in the work of improving waste management. 37.5° fibers with enhanced biodegradation accelerate the natural degradation process when placed in landfill conditions. These fibers are also recyclable and are converted to naturally occurring materials so they do not contribute to problem with microplastics. 37.5° is a trademark of Cocona Labs.

Read more about the technology and test results on [snickersworkwear.com](https://snickersworkwear.com).

### BCI

The Better Cotton Initiative (BCI) — a global not-for-profit organisation — is the largest cotton sustainability programme in the world. BCI exists to make global cotton production better for the people who produce it, better for the environment it grows in and better for the sector's future. BCI aims to transform cotton production worldwide by developing Better Cotton as a sustainable mainstream commodity. Farmers who grow Better Cotton commit to grow cotton in line with Better Cotton principle, which covers the following areas: minimising the harmful impact of crop protection, water stewardship, caring for soil health, fibre quality, biodiversity and responsible land use and decent work.

### Coolmax®

Coolmax® fabrics are designed to move moisture away from the body and enhance fabric drying rate, thus keeping you feeling cool and dry. The Coolmax® fibre is a specially engineered polyester fibre with an increased surface area. The fibre forms a transport system that pulls moisture away from the skin to the outer layer of the fabric where it spreads and dries quick.

The performance of Coolmax® is inherent in the fibres structure itself, thereby providing consistent performance wash after wash.

Coolmax® is a trademark of INVISTA Inc.

### CORDURA®

An extremely tough and hardwearing material, used to reinforce exposed parts such as pockets, knees and sleeves. It is also water and dirt repellent, easy to care for and retains its shape.

It is a high technology fabric made with air-textured polyamide fibres able to meet the toughest standards of strength and durability.

CORDURA® is a trademark of NVISTA Inc.

### D3O®

D3O® smart materials specialise in impact protection and shock absorption. Its unique patented polymer composites contains a chemically engineered dilatant as an energy absorber. The material's molecules flow freely in standard conditions, but on impact, they lock together to absorb and disperse energy, before instantly returning to their flexible state. This unique characteristic provides enhanced impact protection, while providing versatile and flexible materials that can be manufactured for a host of impact protective applications. Note: D3O® does not "go hard".

Snickers Workwear uses different D3O® material grades specially tuned for a wide range of temperatures that offer enhanced cushioning, long-term comfort and superior impact protection on key contact areas.

### GRS

The Global Recycled Standard (GRS) is an international, voluntary, full product standard that sets requirements for third-party certification of recycled content, chain of custody, social and environmental practices, and chemical restrictions. The standard helps consumers gain more confidence in recycled content product claims. Learn more at [GlobalRecycled.org](https://GlobalRecycled.org)

### Heat Ready®

Heat Ready® is a groundbreaking heating solution, featuring the worlds thinnest heating panels.

Inuheat One is the hub of the Heat Ready ecosystem. The smart electronics allow you to have and control the active heat in all different Heat Ready products. The concept of a battery for several different applications is recognizable from, for example, modern hand tools available today.

### Hipora®

Hipora® is a waterproof and breathable membrane used for gloves. It keeps your hands dry and comfortable.

Hipora® is a trademark of Kolon Industries.

### Kevlar® by DuPont

Kevlar® by DuPont is a high-performance fiber engineered for exceptional strength, durability and lightweight protection. Trusted worldwide, it powers innovations ranging from ballistic armor and protective apparel to durable workwear garments.

### LYCRA® T400®

LYCRA® T400® fibre provides excellent performance and aesthetics in applications that require low to moderate stretch. It's a multi-component yarn in which different polymers are joined together within each filament. When exposed to heat, each polymer shrinks to a different degree, producing a smooth helical crimp. Because the crimp is not mechanically induced, the stretch and recovery of LYCRA® T400® fibre is greater and more durable than those of textured yarns. 18% of the polymer is made using renewable plantbased material for a more sustainable lifestyle.

### OEKO-TEX®

The OEKO-TEX® label indicates the additional benefits of tested safety for skin-friendly clothing and other textiles.

The International OEKO-TEX® Association is an independent test institute, testing textiles for harmful substances according to OEKO-TEX® Standard 100 for textile products of all types which pose no risk whatsoever to health.

### Protal®

Protal provides the most comfortable and cost-effective garment solutions for flame retardant and multi-hazard PPE (personal protective equipment) end uses. Utilising a unique blend of Protex Q, cotton and other technical fibres, Protal is used to produce knitted and woven garments that are worn daily by hundreds of thousands of end users worldwide from oil and gas to utility and military.

Offering exceptional performance, including electric arc protection, Protex Q fibre is the only modacrylic which has been specifically designed for PPE use and is Oeko-tex Class 1 compliant and REACH ready. All Protal garments include the very latest generation Protex Q fibre blends manufactured by only the very best technical textile producers in the world.

### Polartec® Fleece Series

In 1981, Polartec® became the first to knit, nap, and shear synthetic yarns into thermal fabric for outdoor apparel. The Polartec® synthetic fleece fibres were engineered for more versatile durability. With greater resiliency, lightweight warmth and fast drying times, Polartec® fleece remains the industry standard for outerwear performance. Polartec® fleece comes in Micro, 100, 200 and 300 weights.

### Polartec® Shed Less Technology

Discover the innovation behind Shed Less Technology, which combines advancements in yarn construction, knitting, chemistry, and manufacturing processes. This groundbreaking approach reduces fiber shedding by up to 85% during home laundering, minimizes loose fibers, and ensures fibers resist breaking over time. Now, you can enjoy the original look, feel, and performance you trust, with the added benefit of longer-lasting durability and less shedding.

### Polartec® Power Stretch®

Polartec® Power Stretch® is a performance-fit fabric platform that raises the bar for stretch fabric capabilities. Advanced dual-surface knit construction gives Power Stretch® enough tensile strength for durable shape recovery. Performance wicking abilities mean it keeps up with any activity.

### Polartec® Thermal Pro®

A cutting-edge fibre composition known for its outstanding insulation, thermoregulation, and breathability properties. Crafted with premium polyester yarns, this technically advanced fabric boasts exceptional functionality, durability, and a soft touch.

### PrimaLoft Gold Aerogel

Originally developed for space exploration, PrimaLoft Gold Aerogel is an ultralight, efficient insulation material that provides exceptional thermal protection. Its waterproof, windproof, and lightweight properties make it ideal for applications like the Power Pocket, which shields cell phones and extends battery life in cold conditions.

### Sorona®

The Sorona® fibre offers environmental benefits and great performance. Sorona® has a unique PTT molecular structure designed for maximising performance and provides stretch without spandex. 37% of the polymer is made using renewable plant-based material for a more sustainable lifestyle. The fibre is an eco-efficient performance fibre that also offers exceptional softness and a rich feel for day-in, day-out comfort. Garments featuring the Sorona® fibre retain their shape and resist bagging for maximum comfort on the move.

### REPREVE®

As part of our continuous sustainability work, we have upgraded some of our styles with REPREVE®, the world's number-one brand of recycled performance fibre. In order to make sustainable claims reliable, the REPREVE® fabric is verifiable through the U-Trust® Verification program. This means the fibre contains the unique FiberPrint® tracer technology and the fabric is analysed to validate REPREVE® content claims and composition.

### Thinsulate

#### Thinsulate™

Thinsulate™ insulation has very high insulation properties compare to its weight. The fine fibres that make up Thinsulate™ insulation, work by trapping air molecules between you and the outside.

The more air a material traps in a given space, the better it insulates you from the cold outside air.

Thinsulate™ is breathable, moist-resistant and machine washable.

Thinsulate™ is a trademark of 3M™.

# Measure right — for a good fit.

Carefully follow our measuring tips below to make sure you get the right size. Snickers Workwear keeps all standard sizes in stock for speedy deliveries (see specific garment for the standard size range). We also offer special sizes — delivery may take a little longer, but it's well worth it. Outside sizes are available to order with 50% extra surcharge.

## A. Body length.

Top of the head to the sole of the foot.

## B. Chest.

Chest width, horizontally at the widest place.

## C. Waist.

For One-Piece trousers, Overalls and Jackets. Waist width horizontally at navel height.

## D. Lower waist.

For Trousers.

Lower waist width at the place you wear your trousers.

## E. Seat.

Seat width, horizontally at the widest place.

## F. Inside leg.

Crotch to the sole of the foot. Extremely important measurement to ensure the kneepads end up in the right position.

### Important measurement tips.

1. Get help from someone to take your measurements.
2. Take measurements dressed in body-tight underwear.
3. Measure tight against/around your body, but without the measuring tape being pulled so hard that it "cuts" in.
4. When measuring the inside leg, make sure the measuring tape is firmly extended.

Every CE-marked garment has to have a label with a pictogram that shows the size and the body measurements of the person that the garment is intended for. This means that you always can check inside the garment to see the size.

## Getting the right size.

1. Choose the right size chart below.
2. Look for your body measurements in the chart and choose the corresponding size.
3. To ensure an optimal fit — try them on for real!

### MEN'S TROUSERS

\* **Closest corresponding jeans size.** Sizes within the blue frame are Standard Stock Items which are available for most of our trousers — see specific garment for current size range. **Shorts** are available in Regular length. **Pirates** are available in Short and Regular lengths.

### MEN'S ONE-PIECE TROUSERS, BIB & BRACES

**Important:** It is important that you take into consideration your full waist measurement (C) when choosing the size of one-piece trousers/bib & braces. You may need a bigger size compared to on-the-waist trousers to make sure there is enough space for your stomach.

| Your head circumference in cm measured at widest point. | <b>cm</b> | 56–58    | 58–60    | 60–62    |

## GLOVES

Always choose gloves with the right finger length. Try them on to find the right one.

|                             |           |          |          |          |           |           |
|-----------------------------|-----------|----------|----------|----------|-----------|-----------|
| <b>Your size</b>            |           | <b>7</b> | <b>8</b> | <b>9</b> | <b>10</b> | <b>11</b> |
| <b>1</b> Hand circumference | <b>mm</b> | 178      | 203      | 229      | 254       | 279       |
| <b>2</b> Hand length        | <b>mm</b> | 171      | 182      | 192      | 204       | 215       |
| Minimum length of glove*    | <b>mm</b> | 230      | 240      | 250      | 260       | 270       |

\* If the glove is made for a specific application, it is possible to depart from the requirements of minimum glove length if it is stated in the user guide.

  Sizes within the blue frame are Standard Stock Items.

Ensure you get optimally fitting garments  
– **Try them on for real!**

### A. Body length.

Top of the head to the sole of the foot.

### B. Chest.

Chest width, horizontally at the widest place.

### C. Waist.

For One-Piece trousers, Overalls and Jackets.  
Waist width horizontally at navel height.

### D. Lower waist.

For Trousers.

Lower waist width at the place you wear your trousers.

### E. Seat.

Seat width, horizontally at the widest place.

### F. Inside leg.

Crotch to the sole of the foot. Extremely important measurement to ensure the kneepads end up in the right position.

**Please note!** Topwear and Fleece are available in Regular length.

## Workwear that fit the female form.

Our workwear is purposefully built to meet the specific needs of your job. And that's just as true for our women's workwear as for everything else we make. Functionality and durability where you need it, and comfort and fit where you demand it. And that of course also means that our women's workwear is specifically designed for the female anatomy. Trousers that are wider at the hips, and tops that are narrower at the waist, all for an optimal fit and efficient ergonomics.
